Abstracts

The First and probably the Longest aviation super-cycle of the 21st century; driven by a multitude of favourable macroeconomic factors and spanning a 15 year period since 2003; has created a significant order backlog for the industry which is likely to provide significant propulsion to the aviation industry value chain over the next decade. The OEMs have been focused strongly on ramping up aircraft production rates to meet delivery schedules with aircraft deliveries by the industry in 2018 likely to reach a record high with production output on key aircraft programs going up translating into top line growth for the industry.

The order backlog across the OEMs is dominated by the narrow body aircraft segment in volume terms and by the wide body aircraft segment in value terms. Next generation aviation turbofan engines, featuring a high bypass ratio and extensive usage of technological innovations, from the competing engine powerhouses have just entered service or are anticipated to make their debut over near term and are likely to form a major chunk of new deliveries over medium term given the composition of order backlog across aircraft OEMs.

The technology landscape across industry is evolving radically with hybrid-electric propulsion technologies for commercial aircrafts, aimed at reducing CO2 emission levels drastically while scaling down operating costs substantially, likely to become a functional reality by the middle of next decade with an all European industry consortium being one of the largest cohorts focused on pursuing R&D on the electric propulsion technology. Additionally, resurgence of supersonic air travel, with some industry backed

start-ups actively pursuing the development of prototypes targeting an EIS of early to mid-2020s; is likely to bring the next wave of technology led disruption to the industry.

Airlines profitability continues to be on the upward growth trajectory with 2018 likely to be another boom year for the airlines with the profitability projected to register double digit growth rate to reach \$38.4 billion in 2018, despite the spike in crude oil prices & pressures from escalating labour costs, which overall augurs well for the engine manufacturers from the MRO revenues standpoint.

The engine manufacturers are readying up their industrial base for a planned, major production ramp up over near term to meet delivery timelines with some transitioning from production of previous generation engines to latest engine programs. Pratt & Whitney, especially, has a tough task ahead with order intake for its GTF engines taking a hit in 2017 and the latest technology glitch episode on the PW1100G likely to again play a spoilsport for Airbus and Bombardier in 2018, with reference to aircraft deliveries, which are likely to be impacted once again. Further, 2018 is going to be an important year for the industry with three new aircraft programs scheduled to enter service, led by, Boeing's 737 MAX 9, Airbus A321 LR and Embraer's E190-E2, thereby, providing CFM with opportunities to further up the ante on Pratt & Whitney in the narrow body aircraft segment with its LEAP engines family which has really made a head start. Additionally, Boeing's proposed New Mid-market Airplane (NMA); which is going to be Boeing's first scratch-up commercial aircraft program since 787 in 2003; will be the key growth pie being looked at avidly by all engine manufacturers over near term with a sole source strategy likely to be pursued by Boeing and the three way engine competition apparently stacked in favour of CFM.

Against this backdrop, the report analyses & provides comprehensive insights into the Global Commercial Aircraft Turbofan Engines Market with focus on a blend of quantitative & qualitative analysis. The part 1 of the report takes a look at the current Market Size, Dynamics & Competitive Landscape for Commercial Aircraft Turbofan Engines. Part 2 provides detailed analysis on Engine Manufacturers, including, Comprehensive Analysis of Key Strategies & Plans, product portfolio & financial analysis and SWOT analysis. Part 3 projects market evolution for commercial aircraft turbofan engines over long term with analysis of emerging market scenario, demand growth projections through 2036, key market & technology trends, issues & challenges, potential growth opportunities and demand outlook for commercial aircrafts over the next two decades.

Relevance & Usefulness: The report will provide answers to key questions, which include:-

What is the Structure & Size of the Global Commercial Aircraft Turbofan Engines Market?

How is the Global Commercial Aircraft Turbofan Engines Market split across players, in terms, of Market Shares?

Which are the Fastest Growing Segments of the Global Commercial Aircraft Turbofan Engines Market?

What are the Strategic Areas being focused upon by the Engine Manufacturers?

What are the Key Strategies & Plans being Conceptualized & Pursued by leading Engine Manufacturers?

Which are going to be the Key Growth Markets & Regions for Commercial Aviation & Aircraft Turbofan engines through 2036?

Which are the Key Industry, Market & Technology Trends likely to Shape Future of Aircraft Engines?

For Whom: Business Leaders & Key Decision-Makers across Industry Value Chain

The report will be essential for Key Decision-Makers & Senior Industry Executives. The report will be especially useful for Program Managers, Procurement Managers, Airlines, Top Management of Industry Players & Other Companies, Industry OEMs, Suppliers, Vendors, MRO Services Providers, Technology & Other Services Solutions Providers and other Key Players in the Industry Value Chain. The report will also be useful for existing & potential Investors, Industry & Company Analysts, M&A Advisory Firms, Strategy & Management Consulting Firms, PE Firms, Venture Capitalists, Financing & Leasing Companies, Researchers and all those associated with the industry or any of these companies.

Contents

SECTION - 1

Global Commercial Aircraft Turbofan Engines Market

1.1 Introduction & Overview

1.2 Global Aviation Gas Turbine Engines Market – Key Segments

1.3 Global Commercial Aircraft Turbofan Engines Market

1.4 Market Size – Commercial Aircraft Turbofan Engines - in Units & Value

1.5 Global Commercial Aircraft Turbofan Engines Fleet – Distribution by Engine Manufacturers

1.6 Global Commercial Jet Aircraft Fleet – Share of Engine Manufacturers

1.7 Global Commercial Aircraft Market - Key Drivers

SECTION – 2

2.1 Competitive Landscape

2.2 Global Commercial Aircraft Turbofan Engines Market – Commercial Jets - Market Shares by Engine Manufacturers - In Units & Value

2.3 Market Shares for Commercial Narrow Body Aircraft Segment

2.4 Market Shares for Commercial Wide Body Aircraft Segment

2.5 Market Shares for Engine Manufacturers - Regional Aircraft Segment

2.6 Market Shares for Engine Manufacturers across key Aircraft Programs – Delivery Units

Engine Deliveries Share

Backlog Share

2.7 Market Shares for Engine Manufacturers for Key Geographic Regions

North America

Europe

Asia-Pacific

South America

Middle East & Africa

Analysis on Top 4 Engine Manufacturers – Commercial Aircraft Turbofans –

GE Aviation

Pratt & Whitney

Rolls Royce

Safran (CFM International)

SECTION- 3

Business Structure & Snapshot

- a) Founded
- b) Headquartered
- c) Business Segments
- d) Employees
- e) Product Portfolio - Major Engine Families, Presence on Aircraft Programs and Key Competitors
- f) Market Capitalization
- g) Key Executives
- h) Shareholding Pattern & Structure

SECTION – 4

Financial Performance Snapshot –Charts & Analysis for each Company:

1. REVENUE BASE & GROWTH TREND
2. REVENUES SPLIT BY KEY SEGMENTS
3. REVENUES SPLIT BY KEY GEOGRAPHIC MARKETS & REGIONS
4. GROSS EARNINGS & MARGIN TREND
5. OPERATING EARNINGS & OPERATING MARGIN TREND
6. RETURN ON SALES TREND
7. PROFITABILITY GROWTH TREND
8. CASH FLOW FROM OPERATIONS
9. R&D EXPENDITURE TREND
10. CAPEX TREND

SECTION – 5 - STRATEGIC POSITIONING & SWOT ANALYSIS – FOR EACH OF THE 4 KEY ENGINE MANUFACTURERS

Strengths to be Leveraged

Weaknesses to Overcome

Opportunities for Growth

Threats to be Mitigated

SECTION – 6

Key Strategies & Plans – For Each of the Top 4 Commercial Aircraft Turbofan Engine Manufacturers -

Comprehensive Analysis of Key Strategies & Plans for each Engine Manufacturer

- Product & Services Portfolio Strategies & Plans
- Market Specific Strategies & Plans
- R&D Strategies & Plans
- Growth Strategies & Plans
- Business & Corporate Strategies & Plans
- Sales & Marketing Strategies & Plans
- Production/Manufacturing Strategies & Plans
- Financial Strategies & Plans
- Acquisitions, Strategic Alliances & JVs
- Other Strategies & Strategic Initiatives

SECTION – 7

Global Commercial Aircraft Turbofan Engines Market - Force Field Analysis –
Analysis of Driving & Restraining Forces and their Overall Dynamics

- Driving Forces
- Restraining Forces

SECTION – 8

Key Trends

- Industry Trends
- Market Trends
- Technology Trends

SECTION – 9

Key Issues, Challenges & Risk Factors

SECTION – 10

Strategic Market Outlook – Commercial Aircraft Turbofan Engines Market - 2017-2036

- 10.1 Analysis of Emerging Market Scenario for Commercial Aviation Sector
- 10.2 Global Demand Outlook – Commercial Aircrafts – 2017-2036
- 10.3 Demand Growth Projections for Commercial Aircrafts through 2036 –
 - 10.3.1 Narrowbody
 - 10.3.2 Widebody
 - 10.3.3 Regional Jets
- 10.4 Demand Growth Projections for Aviation Turbofan Engines 2017-2036 –

10.4.1 Engines Demand Forecasts - in Numbers

10.4.2 Value of Projected Engines sales over the forecast period - In \$Trillion

10.5 Engines Demand Projections by Market Segments – In Units and Value – Through 2036

10.6 Engines Demand Forecasts by Thrust Class - In Units and Value – Through 2036

10.7 Engines Demand Forecasts by Geographic Regions - Through 2036 - In Units and Value

North America

Europe

Asia-Pacific

South America

Middle East & Africa

I would like to order

Product name: Global Commercial Aircraft Turbofan Engines Market - 2018-2036 - Market Dynamics, Competitive Landscape, Strategies & Plans for Engine Manufacturers, Trends & Growth Opportunities, Market Outlook

Product link: <https://marketpublishers.com/r/G728A274ECBEN.html>

Price: US\$ 2,995.00 (Single User License / Electronic Delivery)

If you want to order Corporate License or Hard Copy, please, contact our Customer Service:
