Abstracts

The 2022 edition of the report provides a comparative SFAS framework analysis, developed originally by Wheelen & Hunger, on the Global Top 5 Business Jet manufacturers based on a holistic analysis of their strategic market positioning and degrees of responsiveness to the internal & external environment respectively amid a rapidly evolving industry, global macroeconomy and market landscape. The objective of the analysis is to assess as to how favorably is each company positioned against the prevailing market backdrop and how responsive it is to the nature & pace of changes taking place within its internal and external environment respectively. The framework generates an insightful strategic snapshot and a quantitative SFAS score for each company by identifying, weighing, prioritizing & ranking significant strategic factors present in the internal & external environments through an Internal Factor Analysis Summary (IFAS) matrix & External Factor Analysis Summary (EFAS) matrix respectively. These strategic factors are then ranked based on their strategic significance & potential degree of impact along-with each respective company's corresponding degree of responsiveness to these factors. The final Strategic Factor Analysis Summary (SFAS) matrix amalgamates the IFAS & EFAS matrices into a single matrix followed by a re-evaluation & second level ranking & responsiveness rating, which leads to the generation of an overall score, thus, providing a holistic, overarching strategic view on each industry OEM.

The numeric SFAS scores and the corresponding analysis produced by the framework, thus, are highly useful for competitive & comparative analysis on industry players from a current as well as near term perspective with the framework analyzing the ability of each

OEM to be able to create & capitalize on potential growth opportunities effectively by harnessing & navigating the changing market & technology landscape effectively while leveraging structural & core strengths and negating threats & overcoming challenges simultaneously.

SFAS, as a framework, thus, scores significantly over the traditional SWOT analysis framework, in terms, of its ability to quantify a range of strategic factors based on the nature & potential degree of effect of each strategic factor being analyzed, thereby, making it a much more effective tool for competitive assessment and comparative analysis of industry players.
