Abstracts

The 2018-2019 annual edition of this report provides a comprehensive SFAS Framework Analysis and overall SFAS score on each of the Global Top 6 Agriculture Equipment Manufacturers based on an analysis of each OEM's strategic positioning in the existing market dynamics and its degree of responsiveness to its internal & external environment respectively. The objective of the analysis is to assess as to how favorably is each company positioned and how responsive it is to the nature & pace of changes taking place within its internal and external environment respectively. The framework generates an insightful snapshot of the prevailing, holistic strategic equation for each company by identifying, weighing, prioritizing & ranking significant strategic factors present in the internal & external environment through an Internal Factor Analysis Summary (IFAS) matrix & External Factor Analysis Summary (EFAS) matrix respectively. These strategic factors are then ranked based on the strategic significance & potential degree of impact along-with each respective company's corresponding degree of responsiveness to these factors. The final Strategic Factor Analysis Summary (SFAS) matrix amalgamates the IFAS & EFAS matrices into a single matrix followed by a reevaluation & second level ranking & responsiveness rating which leads to the generation of an overall score, thus, providing a holistic, overarching view on each industry player.

The numeric SFAS scores and the analysis produced by the framework, thus, are highly useful for competitive & comparative analysis from a current as well as emerging perspective with the framework assessing the strategic positioning & the degree of

responsiveness of each company towards the present as well as emerging market dynamics, thereby, analyzing the ability to be able to create & capitalize on potential growth opportunities effectively by harnessing & navigating the changing market & technology landscape effectively while leveraging structural & core strengths and negating threats & overcoming challenges simultaneously.

SFAS, as a framework, thus, scores significantly over the traditional SWOT analysis framework, in terms, of its ability to quantify a range of strategic factors based on the nature & potential degree of effect of each strategic factor being analyzed, thereby, making it much more effective for competitive assessment as well as analysis with the creation of a quantitative strategic snapshot on each market player.

The Global agriculture equipment market is gaining traction & recovering in 2018 marked by steady improvement & recovery in agriculture commodity prices after a period of low commodity prices which impacted the farm incomes significantly. The demand for agriculture equipment had been rattled by an oversupply driven market scenario over the 2013-2017 period with the demand having bottomed out in 2017. The OEMs are gearing up for the upswing after a prolonged period of operating at sub optimal pace with focus on ramping up production rates and fine tuning supply chains to efficiently meet increasing demand levels and avoid logistical gaps. The OEMs are also renewing their product portfolios in alignment with the market upturn through new product introductions incorporating cutting edge technologies and features focused on enhanced performance as well as productivity while optimizing the total cost of ownership. Against this backdrop, this SFAS Framework Analysis will thus be crucial to understand & assess as to how are the OEMs strategically positioned in a rapidly changing and evolving industry dynamics and market environment and how adaptive, responsive & prepared are they to be able to ride the waves of change & disruption blowing through the market.
