Abstracts

The 2022 edition of this Annual Strategy Dossier report analyses the overall strategy focus and provides Insights into the Strategies & Plans being conceptualized & pursued by Iveco S.p.A. for the near to medium term horizon with the global economy trying to make a comeback from the COVID-19 pandemic. Iveco continues to focus significantly on transition to sustainable transportation with plans to further expand its portfolio of alternate fuel based powertrain options, aligned with CNH's Clean Energy Leader strategy, geared towards decarbonization of Class 8 heavy trucks in North America & heavy trucks in Europe through development of hydrogen fuel cell and battery electric propulsion technologies as the core pivots. CNH's strategic & exclusive partnership agreement with Nikola Motors for the development of zero emission Class 8 battery electric & hydrogen powered heavy trucks, along with a manufacturing JV for Europe, has been pathbreaking and is likely to provide it quick inroads into the strategic North American Class 8 truck market. The push towards sustainable transportation is likely to get further traction following the spin-off CNH's on-highway businesses from the group as a separate business entity going forward, following the receipt of shareholders approval in early 2022, with much greater focus and degree of capitalization for the required R&D investments and pursuit of acquisitions for the rapid development of technological capabilities. Iveco also plans to grow its revenues & profitability by around 40% to 50% by 2026.

The Global Trucking industry has been recovering steadily from the COVID-19 outbreak while being at the crossroads of fundamental changes, disruption & transformation with trucking cruising in top gear amid booming order intake as well as freight volumes & rates and robust fleet utilization levels across fleet operators which reached pre-COVID-19 levels across most key global markets, except China. Trucking has also

been facing modest headwinds in form of supply chain disruptions & bottlenecks, semi-conductor chip shortages & rising input as well as material costs which have been impeding the overall recovery momentum. The industry also continues to make steady progress towards development of a range of sustainable technologies geared towards decarbonization of transportation over long term while continuing the development of innovative services & business models configured on connectivity & autonomy. However, projections for the slowdown of global economic recovery over near term owing to uncertainty over the likely direction of the pandemic & rising inflation levels necessitating monetary policy tightening are likely to be a concern for the industry. Overall, Trucking is projected to maintain its cruising speed & overall growth momentum across most markets in 2022, with the exception of China, which is in the correction mode following real-estate sector woes and a zero-tolerance policy towards COVID-19.

Against this backdrop, the report provides a comprehensive analysis on the company starting with a detailed business and financial snapshot, incorporating charts, tables and analysis based on latest financial statements. An insightful & comprehensive SWOT framework analysis is also provided; which is used extensively for scanning, assessment & analysis of the internal as well as external business environment of an organization as part of strategic planning process. The framework generates a snapshot of the company's inherent strengths & weaknesses as part of the internal environment assessment and outlines potential growth opportunities as well as threats as part of the external environment assessment.

The report also incorporates analysis of key industry trends, issues & challenges and risk factors besides identifying key driving & restraining forces & assessing their potential degree of impact through a force field analysis. The report concludes by providing comprehensive market outlook for the global medium & heavy truck market over medium term with overview of demand projections across key markets & regions.
