Abstracts

The 2022 edition of this Annual Strategy Dossier report analyses the overall strategy focus and provides Insights into the Key Strategies & Plans being conceptualized & pursued by Deere & Co. for its Agriculture & Turf business for the near to medium term with demand for agriculture equipment in a marked upswing phase powered by higher agriculture commodity prices & favorable farm economics across most key markets with net farm incomes in the U.S. growing by almost 25% year-on-year for 2021 with above average forecasts for farm sector profits for 2022 with global economy striving to make a comeback from the COVID-19 pandemic. The net cash receipts from the sale of agricultural commodities are also likely to grow by almost 7% for 2022. However, a decrease in direct government payout over COVID-19 relief in 2022 and an increase in production expenses are likely to impact & partially offset the same.

The Global Agriculture Industry has been doing well amid logistical, supply chain and labor force disruptions caused by the pandemic while also facing semi-conductor chip shortages & rising input as well as material costs causing the demand to outpace supply across many key product segments. The industry also continues to make steady progress towards development of a range of sustainable technologies geared towards decarbonization of transportation over long term while continuing the development of innovative services & business models configured on connectivity & autonomy. However, uncertainty over the likely direction of the pandemic & rising inflation levels necessitating monetary policy tightening are likely to be a concern for the industry. Overall, demand for agriculture equipment is projected to maintain its overall growth momentum across most key global markets in 2022.

Against this backdrop, the report provides a comprehensive analysis on the company starting with a detailed business and financial snapshot, incorporating charts, tables and analysis based on latest financial statements. An insightful & comprehensive SWOT framework analysis is also provided; which is used extensively for scanning, assessment & analysis of the internal as well as external business environment of an organization as part of strategic planning process. The framework generates a snapshot of the company's inherent strengths & weaknesses as part of the internal environment assessment and outlines potential growth opportunities as well as threats as part of the external environment assessment.

The report also incorporates analysis of key industry trends, issues & challenges and risk factors besides identifying key driving & restraining forces & assessing their potential degree of impact through a force field analysis. The report concludes by providing comprehensive market outlook for the global agriculture equipment market over near to medium term with overview of demand projections across key markets & regions.
