Abstracts

The 2019 annual edition of the report analyses the overall strategy focus and provides Insights into & Comprehensive analysis of the Strategies & Plans being conceptualized & pursued by Sandvik AB for the near to medium term horizon. The global construction equipment demand has made a strong recovery since 2017 with construction activity witnessing a surge across most key global markets driving demand for new equipment and replacement of old ones. The growth rates for 2018, too, have been robust across North America, Europe and China with good demand levels across product segments. However, geopolitical tensions & macroeconomic uncertainty, emanating from the rapid evolution of the traditional, rule based world order; marked by the resurgence of multi-polarity and protectionism, as evinced by the rising trade tensions and regional issues like BREXIT; pose a significant threat to world GDP growth going forward. The demand forecasts for construction equipment for 2019 already indicate towards moderate growth in North America, stabilization of demand across Europe and demand contraction in Asia, including, China.

Against this rapidly evolving industry and market backdrop; the report provides a comprehensive analysis on the company starting with a detailed business and financial snapshot, incorporating charts, tables and analysis based on latest financial statements. An insightful & comprehensive SWOT framework analysis is also provided; which is used extensively for scanning, assessment & analysis of the internal as well as external business environment of an organization as part of strategic planning process. The framework generates a snapshot of the company's inherent strengths & weaknesses as part of the internal environment assessment and outlines potential growth opportunities as well as threats as part of the external environment assessment.

The report also incorporates analysis of key industry trends, issues & challenges and risk factors besides identifying key driving & restraining forces & assessing their potential degree of impact through a force field analysis. The report concludes by providing comprehensive market outlook for the global construction equipment market over medium term with overview of demand projections across markets & regions.
