## **Abstracts**

The 2022 edition of this Annual Strategy Dossier report analyses the overall strategy focus and provides Insights into the Strategies & Plans being conceptualized & pursued by Volvo AB for its construction equipment business for the near to medium term horizon with construction in a marked upswing phase since late 2020 while the global economy has been striving to make a comeback from the COVID-19 pandemic. Volvo's strategy for the near to medium term horizon clearly focuses on the development of next generation construction equipment, featuring cutting edge technologies built around the triad of connectivity, sustainability and autonomy; apart from bolstering profitability and scaling up services business portfolio while turning North America & China into key growth pivots for the future.

The Global Construction Equipment market has been on a roll as of-late with booming demand for equipment across North America & Europe (despite the slump in China) with continued infrastructure investments, strong housing starts in the U.S., strong demand from the commodities segment and robust fleet utilization across operators back to pre-COVID levels while facing modest headwinds in form of continued challenges from the COVID-19 pandemic marked by supply chain disruptions & bottlenecks, labor shortages, rising material costs, limited freight capacity & semi-conductor chip shortages which continue to impede the pace of overall recovery momentum. Further, the recent passing of \$1.2 trillion infrastructure Investment & Jobs Act in the U.S. is likely to provide a massive boost to the construction industry over medium term along with the scheduled transition to sustainability geared towards rapid de-carbonization. However, projections for the slowdown of global economic recovery

over near term owing to uncertainty over the likely direction of the pandemic & rising inflation levels necessitating monetary policy tightening are likely to be key concerns for the industry. Overall, the CE industry is likely to continue riding the ongoing market rally in 2022 with most key markets projected to register steady growth, with the exception of China, which continues to be in the correction mode following real estate sector woes and a zero-tolerance policy towards COVID-19.

Against this backdrop, the report provides a comprehensive analysis on the company starting with a detailed business and financial snapshot, incorporating charts, tables and analysis based on latest financial statements. An insightful & comprehensive SWOT framework analysis is also provided; which is used extensively for scanning, assessment & analysis of the internal as well as external business environment of an organization as part of strategic planning process. The framework generates a snapshot of the company's inherent strengths & weaknesses as part of the internal environment assessment and outlines potential growth opportunities as well as threats as part of the external environment assessment.

The report also incorporates analysis of key industry trends, issues & challenges and risk factors besides identifying key driving & restraining forces & assessing their potential degree of impact through a force field analysis. The report concludes by providing comprehensive market outlook for the global medium & heavy truck market over medium term with overview of demand projections across key markets & regions.
