Abstracts

This strategic report provides key insights into the strategic business aspects of Volvo Construction Equipment based on a holistic assessment as well as comprehensive analysis of business structure, performance, strategies, plans, initiatives & outlook against the backdrop of an evolving industry landscape & shifting global dynamics. The industry, however, has been combating significant pressures of-late with the growth rate in 2012 limited to a low, single digit value amid a difficult & uncertain macroeconomic environment in the western hemisphere and the continued weakness in Chinese market with the economy treading on the recovery path fastidiously since Q4 2012 after the country's long bid to contain inflationary pressures through a host of monetary policy measures. Most global OEMs are facing significant pressure on machinery sales, order intake & profitability as of the end of first quarter of 2013 amid difficult global conditions further compounded by the ongoing slump in mining activity indicating towards tough projections for 2013 with the industry growth projected to stay flat at best and contract by 5%-10% at worst in 2013. The industry fundamentals, however, remain solid and the long-term industry growth prospects still appear robust, driven, primarily, by the significant anticipated investments likely to be made towards infrastructure repair & rebuilding across traditional markets, especially, in the United States and rapid infrastructure development required across emerging markets to sustain economic growth & rapid urbanization.

This report on Volvo Construction Equipment also includes an insightful SWOT framework analysis on the company; which is used extensively for an assessment of the internal as well as external business environment of an organization as part of the strategic planning process. The framework generates a snapshot of the company's inherent strengths & weaknesses as part of the internal environment assessment and

outlines potential growth opportunities as well as threats as part of the external environment assessment.

Useful for:

The report provides insights & inputs to be incorporated into the broader strategic planning & decision making processes and will be essential from a competitive analysis standpoint as well.

The report will be useful for:

Competitive Assessment as well as Comprehensive Strategic Business Analysis

Assessment & evaluation of company's degree of responsiveness as well as strategic orientation towards the External Environment

Gaining access to Key Inputs to be incorporated into the Strategic Planning & Decision-Making Process

Identification of opportunities which could be capitalized upon

Identification of potential threats in the business environment

Analysis of and Insights into key Strategic Initiatives as well as Business Developments being pursued by the company
