Abstracts

The Global Commercial Aircraft market has crossed the peak demand threshold on the demand curve after a shortened, 12 year full scale demand boom cycle; as reflected by the dismal order intake across key industry OEMs over the past 2 years and their prevailing book to bill ratios. The latest demand boom had been driven by a combination of favorable demand drivers, macroeconomic forces and technological advances by the industry which transpired into record airlines profits over the past few years. The last 2 years, however, have witnessed a stagnation & softening of order intake for new commercial aircrafts, especially wide body jets, across most key industry OEMs amid an uncertain geopolitical environment along with resurgence of classic commercial aviation specific issues, most noticeably, trade protectionism & state subsidies, slowing down of global economy with increasing macroeconomic uncertainty and downward spiraling yield trend across airlines operators with projected, near-term increase in oil prices likely to put further pressure on profitability with some leading global legacy carriers already looking actively at measures to trim cost base.

The long term demand drivers & fundamentals for commercial aviation, however, remain firmly in place with a strong passenger traffic growth trend projected over the next 2 decades. The strategic focus across industry OEMs & the industry value chain is laser sharp on ramping up production to deliver on the huge accumulated order backlog, estimated to be worth over 7-8 years of production. The global commercial aircraft market, thus, is juxtaposed between two contrasting trends led by a slowdown in market demand, especially, for new large commercial aircrafts by carriers on the demand side while the industry OEMs & value chain ramp up production to accelerate deliveries on the supply side as they prepare to reap the rich harvest over medium term. Further, the year 2017 is going to be significant for the industry with a number of new

commercial aircraft programs scheduled to enter service led by A321neo, 737MAX and the 787-10. Further, the rapid rise of Chinese, Russian and Japanese capabilities in the design, development & production of commercial aircrafts is likely to pose significant & serious threat to the traditional Airbus-Boeing duopoly in the LCA space over long term.

The commercial aviation sector OEMs, thus, buoyed by the record order backlogs and having fine-tuned their medium term product portfolio strategies; are focusing their efforts on & planning ways to increase aircraft production rate over near term to meet original delivery schedules and to harness the long-term visibility of their order books effectively through optimization of industrial footprint and enhanced alignment of capital expenditure and allocation of resources with the order book position & demand trend. All the OEMs are making significant investments towards expansion of their existing industrial base in-line with the planned, significant increase in aircraft production rate over near term and aligning & fine-tuning their strategies with emerging as well as latent industry trends & developments. Additionally, with a significant share of demand projected to emanate from emerging markets, led by the Asia-Pacific region; all industry players are working towards achieving further diversification of their global industrial footprint across traditional & emerging markets over medium term.

Against this backdrop, the report provides a comprehensive analysis of the key strategies and plans being conceptualized and pursued by the world's 10 leading commercial aviation companies amid the continued, robust demand for commercial airplanes projected over the next 2 decades driven by continued series of fleet renewals & fleet expansion across airlines globally fuelled by R&D powered technological innovations and growth in low-cost carriers across key global markets. The report also analyzes the strategic positioning of these 10 key industry players in the commercial aviation sector and provides a comprehensive SWOT framework analysis on them.

Relevance & Usefulness: The report will be useful for

Strategic Planning, Competitive Analysis & Decision-Making Processes

Competitor Analysis & Comparative Analysis of the 10 Leading Commercial Aviation Companies

Strategic Focus, Growth Strategies and Plans for the Companies Covered - Analysis & Insights

Identification of & Insights into Potential Growth Opportunities & Avenues –
Segments & Regions

Comprehensive Analysis of Key and Emerging Industry Trends & Growth
Opportunities

Analysis of Key Forces Shaping the Industry's Future & their overall Dynamics

Demand Forecasts & Analysis of Growth Trajectory for Commercial Aircrafts
through 2035

Identifying & highlighting areas for potential Strategic Changes, Adjustments &
Realignment

For Whom:

The report is a niche, key & vital resource on the Business Strategy Domain given its unique disposition & strategic focus on leading Global Commercial Aviation sector companies. The report would be quintessential for those having strategic interest in the Commercial Aviation sector or any of these companies & will be especially useful for Program Managers, Procurement Managers, Airlines, Key Decision-Makers, Top Management of Companies, OEMs, Suppliers, Distributors, Vendors, MRO Services Providers, Technology & Other Services Solutions Providers. The report will also be useful for existing & potential Investors, Industry & Company Analysts, M&A Advisory Firms, Strategy & Management Consulting Firms, PE Firms, Venture Capitalists, Financing & Leasing Companies, Researchers and all those associated with the industry or any of the companies covered in the report.

Features, Benefits & Reasons to Procure:

Provides Macro View and Big Picture Quickly

Significant Time Savings

Visual Representation

Meetings & Presentation Ready Format

Superior & Enriched User Experience with Incorporation of Relevant Images

Contents

SECTION - 1

Business Structure & Snapshot – For each of the 10 Leading Commercial Aviation Companies

- a) Founded
- b) Headquartered
- c) Business Segments
- d) Employees
- e) Revenues
- f) Market Capitalization
- g) Key Executives
- h) Shareholding/Ownership Pattern & Structure

SECTION - 2

Financial Performance Snapshot & Analysis – Charts & Analysis for each Company:

1. Revenue Base & Growth Trend
2. Revenues Split by Key Segments
3. Revenues Split by Key Geographic Markets & Regions
4. Gross Earnings & Margin Trend
5. Operating Earnings & Operating Margin Trend
6. Return on Sales Trend
7. Profitability Growth Trend
8. Cash Flow from Operations
9. R&D Expenditure Trend
10. CAPEX Trend

SECTION – 3 - STRATEGIC POSITIONING

SWOT Analysis – For Each of the 10 Leading Industry Players

Sources of Strengths to be Leveraged

Weaknesses to Overcome

Opportunities for Growth

Threats to be Mitigated & Negated

SECTION – 4

Strategy Focus, Key Strategies & Plans – Medium Term – For each of the 10 Leading Industry Players

1. Product Portfolio Strategies & Plans
2. Market Specific Strategies & Plans
3. R&D Strategies & Plans
4. Growth Strategies & Plans
5. Business and Corporate Strategies & Plans
6. Sales & Marketing Strategies & Plans
7. Production/Manufacturing Strategies & Plans
8. Financial Strategies & Plans
9. Key Strategic Priorities & Imperatives

SECTION – 5

Key Trends

Industry Trends

Market Trends

Technology Trends

SECTION – 6

Key Issues, Challenges & Risk Factors

SECTION – 7

Global Commercial Aircraft Market - Force Field Analysis - Analysis of Driving & Restraining Forces and their Overall Dynamics

Driving Forces

Restraining Forces

SECTION – 8

Strategic Market Outlook – Commercial Aviation Market 2016-2035

Analysis of Emerging Market Scenario for Commercial Aviation Sector

Global Demand Outlook – Commercial Aircrafts – 2016-2035

Demand Growth Projections for Commercial Jets through 2035 – Narrowbody, Widebody & Regional Jets

Demand Growth Forecasts for Regions
