Date: January 2013

Pages: 0

Price: US\$ 3,315.00 (Single User License)

ID: EE327CCAAC9EN

Abstracts

Electricity demand is growing, and demand for cables, insulators and transmission towers is growing with it. However, a variety of distinct development paradigms are at play. While developing countries have primarily seen point-to-point radial distribution instead of intermeshed networks, many developed countries have pursued a policy of putting all urban distribution underground. Policy variations like these can then have knock-on effects. The NRG Expert Global Market for Cables, Insulators and Towers report and database will help you navigate this market sector. It provides detailed data and analysis on annual demand and capital expenditure (capex) for over 180 countries. National grid maps are also included.
