Date: November 2011

Pages: 195

Price: US\$ 8,491.50 (Single User License)

ID: E70237DA42EEN

## **Abstracts**

This new report and database analyse the global Transmission and Distribution market, providing a general overview of the T&D industry. An introduction to Smart Grid, together with assessments and detailed sections on definitions, strategies, security, investment, cost and development issues, definitions of sectors in the industry and grid interconnections and multinational collaboration. The database contains a by-country snapshot overview of the T&D sector. Each region file contains a regional overview of annual Demand, capital expenditure and total generating capacity by country as well as list of details of industry companies. This report and database are user friendly products, giving real insight into the T&D networks that are continuously evolving in both size and nature. The T&D networks must grow in order to cope with ever rising demand. In the past where it was a matter of adding more lines, transformers and ancillary equipment, today the technology of the systems is often able to substitute increased sophistication for physical growth, or to reduce the additions required by making the system more efficient.
