Date: March 2012

Pages: 0

Price: US\$ 841.50 (Single User License)

ID: E4B9D1E47E1EN

Abstracts

T&D networks are continuously evolving in both size and nature. They must grow in order to cope with ever rising demand. In the past where it was a matter of adding more lines, transformers and ancillary equipment, today the technology of the systems is often able to substitute increased sophistication for physical growth, or to reduce the additions required by making the system more efficient. The Electricity T&D Infrastructure and Technologies Regional Databases consists of 9 individual excel databases which are purchased separately. The regions are - North America, CIS, Pacific, South America, Africa, Central America and Caribbean, Asia, Middle East and Europe. Each of the 9 regional databases contains a country-by-country snapshot overview of the Transmission and Distribution sector in that region. Each file contains a regional overview of Annual Demand, Capital Expenditure and total generating capacity by country as well as a list of details of industry companies.
