This technology facilitates its users to handle more data through enhanced storage capacity also enables data retrieval in case of hardware failure.

Hadoop as a solution is increasingly offering data retrieval and data security features. These features are getting better with time. This is leading to enhanced solution to database management systems (DBMS). Hadoop software is the highest growing market in comparison to hardware and services. In terms of geographical segmentation, North America expected to lead the revenues in this market due to higher rate of technology adoption.

The exploding big data from the web has generated huge opportunities for storage and analytics software.
