## Abstracts

The Taiwan automobile report provides a complete perspective on the trends shaping the Taiwan Automobile market. The Taiwan automotive market is slowly shifting towards a service oriented model with new players focusing extensively on customer experience and consumer data. Transitions in automotive markets are providing opportunities for some parts while other components face stiff decline over the forecasts.

Companies across the value chain are forced to adapt to market changes to sustain revenue and profit. New Vehicles must be aligned with the current states of technology and consumer preferences.

Geographical diversification model remains one of the main strategies of leading automobile manufacturers to ensure profitability in high investment and R&D expenditure scenario. Both large players and start-ups are aggressively focusing on connected and autonomous driving vehicles in the country.

Strong government focus on encouraging automotive industry in the country is an important driving force for Taiwan. However, stringent environmental regulations on pollution and carbon emissions are necessitating heavy investments.
