Abstracts

2021 Chocolate Market - Size, Share, COVID Impact Analysis and Forecast to 2027 – is comprehensive research with in-depth data and contemporary analysis of Chocolate Market at a global, regional and key country level, split by different sub-segments of the industry.

Chocolate Market is quickly reaching its pre-COVID levels and a healthy growth rate is expected over the forecast period driven by the V-shaped recovery in most of the developing nations.

Key strategies of companies operating in Chocolate Market Industry are identified as showcasing their contactless manufacturing and delivery methods, highlighting USP statements, focus on product packaging, and increased the presence of products on online platforms.

The food industry is set to experience a few changes in 2021 due to the increased consciousness of consumers in selecting food. This inclination towards sustainable, regenerative, plant-based food and demand for foods and beverages with immunity-boosting ingredients is driving the demand for these products and their constituents. Do It Yourself (DIY) trend has seen huge momentum during Corona times and is expected to continue in 2021.

Considering the rapidly changing market landscape, companies are changing their perspectives on expanding beyond traditional markets. In addition to focusing on widening applications, introducing new product portfolios, most food and beverage companies are planning to capture domestic and international markets.

Fast pace recovery of developing economies leading to increased disposable income will support the Chocolate Market demand between 2021 and 2027.

Lockdowns across the globe in 2020 and continuing restrictions in 2021 disrupted the supply chain posing challenges for manufactures in the Chocolate Market. Intense competition, pricing issues, and shifting consumer preferences will continue to put pressure on vendors' profit margins.
