Abstracts

Global Disposable Blood Pressure Cuffs Market is valued at USD 197.8 million in 2020 and is expected to grow to USD 460.7 by 2026 at a compounded annual growth rate (CAGR) of 15.12%.

The hospital's segment accounted for the largest revenue share in the disposable Blood Pressure cuffs market due to the increasing incidence of hospital-acquired infections along with a growing number of reprocessing failures. The growing occurrence of hospital-acquired infections is important for increased adoption of the disposable Blood Pressure cuffs in hospitals.

Infectious diseases are among the leading causes of death, in particular, with an increasing prevalence of lower respiratory infections, diarrheal diseases, tuberculosis, HIV, and others. Their rising prevalence has correspondingly driven the duration of patient hospital stay. Further, increase in bio-hazards such as microorganisms and medical waste present strong demand for disposable cuffs.

Global healthcare spending is increasing across the world both out-of-pocket and publicly funded with global spending on health estimated at \$9.4 trillion in 2020 as compared to \$7.8 trillion in 2017.

Adults remains the most Dominant segment in the Disposable Blood Pressure Cuffs Patient worldwide with 62% market share in 2019.

According to the US Centers for Disease Control and Prevention, around half a million deaths in the United States included hypertension as a primary or contributing cause and growing incidences of cancer will further increase the demand of disposable Blood

Pressure cuffs.
