Holographic TV market overview –

Holographic TV market illustrates an attractive growth rate during the forecast period with the advancements in technologies. Latest developments in Artificial Intelligence and machine learning abilities to expand Holographic TV applications and drive demand during the forecast period to 2028.

The pandemic COVID 19 has a significant impact on the manufacturers of Holographic TV due to disruptions in the supply chain and frequent lockdowns. Further, the economic slowdown and geopolitical matters have limited the Holographic TV market growth in 2020. As the market recovers from the pandemic, we forecast the growth trajectory to vary across regions with some countries offering huge growth potential while others reporting limited profit margins.

New generation Holographic TV with improved performance offering higher accuracy and flexibility, with easy integration into systems spur the growth in Holographic TV industry. However, a paradigm shift towards a connected world and growing requirement for miniaturization are necessitating further advancement in the Holographic TV market and develop smarter products.

Research and development in the Holographic TV industry to drive down costs and improve functionality are expected to advance in the medium term. Autonomous vehicles poised to hit the mainstream alongside rapid growth in AI computing capabilities with improving commercials are offering enormous opportunities in the Holographic TV market. Over the forecast period to 2028, we forecast the Holographic

TV market to regain growth momentum, mainly with support from developing markets.

Holographic TV market competitive landscape—

On the Holographic TV market structure front, consolidation observed in 2020 was continued in 2021. Mergers and acquisitions are primarily intended to acquiring new technologies, strengthening portfolios, and leveraging capabilities.
