Abstracts

The air freshener market encompasses a wide range of products designed to eliminate odors and impart pleasant fragrances within homes, offices, and other indoor spaces. Traditionally, synthetic fragrances dominated the market, but recent years have seen a significant rise in demand for natural and plant-based alternatives. This trend is fueled by concerns about the potential health risks associated with synthetic chemicals and a growing preference for products that align with sustainable values. In 2024, the market witnessed a notable surge in the popularity of essential oil-based air fresheners, diffusers, and natural sprays. This trend is expected to continue into 2025, further fueled by the increasing adoption of aromatherapy and holistic wellness practices.

Market Overview:

The air freshener market is experiencing a period of dynamic growth, propelled by several key factors. Rising urbanization and increasing disposable incomes are driving consumer spending on home improvement products, including air fresheners. Moreover, the growing awareness of indoor air quality (IAQ) issues, such as volatile organic compounds (VOCs) and allergens, is pushing consumers to prioritize air purification and deodorizing solutions. In 2024, the market witnessed a significant shift towards products that offer both fragrance and air purification capabilities. This trend is expected to gain even greater momentum in 2025 as consumers seek comprehensive solutions to enhance their indoor environments.
