Abstracts

Alcohol-based disinfectants are widely used for killing bacteria, viruses, and fungi on surfaces and hands. They typically contain a high concentration of alcohol, often isopropyl alcohol or ethanol, which denatures proteins and disrupts the cell membranes of microorganisms. The market encompasses a wide range of products, including hand sanitizers, surface disinfectants, wipes, and sprays, formulated for different applications and targeting specific pathogens. In 2024, the market witnessed a significant surge in demand for alcohol-based disinfectants driven by the ongoing COVID-19 pandemic and a heightened focus on hygiene practices. This trend is expected to continue into 2025, as consumers and businesses alike prioritize hygiene and seek effective and reliable disinfection solutions.

Market Overview:

The global alcohol-based disinfectant market is experiencing robust growth, driven by a confluence of factors. The increasing awareness of the importance of hygiene in preventing the spread of infectious diseases is driving demand for disinfectants across various sectors, including healthcare, hospitality, education, and food service. Moreover, the emergence of new and emerging pathogens, coupled with rising antimicrobial resistance, is creating a demand for more effective and reliable disinfectants. In 2024, the market saw a notable increase in demand for alcohol-based hand sanitizers, driven by their portability, ease of use, and effectiveness in reducing the spread of pathogens. This trend is anticipated to continue into 2025, as hand hygiene practices remain a key focus for individuals and organizations.
