Abstracts

The Ambulatory Surgical Centers It Services Market is valued at USD 8.9 billion in 2025 and is projected to grow at a CAGR of 16.7% to reach USD 35.7 billion by 2034. The Ambulatory Surgical Centers (ASC) IT Services Market is expanding as outpatient surgical facilities increasingly adopt digital solutions to improve operational efficiency and patient care. IT services in ASCs include electronic health records (EHRs), revenue cycle management (RCM), telemedicine, and data analytics solutions. The push for cost-effective healthcare delivery has led to higher adoption of IT solutions in these centers. Recent innovations in ASC IT services include cloud-based EHR systems, AI-powered decision support tools, and enhanced data security measures. ASCs are leveraging digital technologies to streamline administrative processes, reduce medical errors, and enhance patient engagement. Telemedicine solutions are also gaining traction, enabling remote consultations and post-surgical follow-ups. The ASC IT services market is expected to see significant growth as digital transformation in healthcare continues. However, challenges such as data integration issues, high implementation costs, and cybersecurity threats may slow adoption. Industry players must focus on interoperability, cost-effective solutions, and robust data security measures to sustain market growth.
