Abstracts

The Global Artificial Intelligence (AI) in Retail Market valued at USD 11.8 billion in 2024, is expected to grow by 30.34% CAGR to reach market size worth USD 170.3 billion by 2034.

The Artificial Intelligence (AI) in Retail market is experiencing a surge in growth as retailers across the globe embrace AI-powered solutions to enhance customer experiences, optimize operations, and gain a competitive edge. AI technologies are being integrated into various aspects of retail, including personalized recommendations, customer service, inventory management, fraud detection, and marketing. AI algorithms analyze vast amounts of data, including customer purchase history, browsing behavior, and social media interactions, to provide insights that help retailers understand their customers better, personalize their offerings, and optimize their operations for greater efficiency and profitability. 2024 witnessed significant advancements in AI-powered retail solutions, with the development of more sophisticated recommendation engines, AI-driven chatbots for customer service, and AI-powered inventory management systems.

The AI in Retail market is poised for continued expansion, driven by several factors. The increasing demand for personalized shopping experiences and the need to meet the evolving expectations of digitally savvy consumers are driving retailers to adopt AI-powered solutions. Furthermore, the growing competition within the retail sector and the need to optimize operations and reduce costs are pushing retailers to leverage AI to gain efficiency and enhance their competitive edge. 2025 is expected to see a further

acceleration in market growth, with AI playing an increasingly crucial role in areas like targeted marketing, automated pricing, and the development of frictionless shopping experiences. As retailers strive to provide seamless and engaging customer experiences and adapt to the ever-changing retail landscape, AI is emerging as a transformative technology that can drive innovation and success in the future of retail. The Global Artificial Intelligence (AI) in Retail Market Analysis Report will provide a comprehensive assessment of business dynamics, offering detailed insights into how companies can navigate the evolving landscape to maximize their market potential through 2034. This analysis will be crucial for stakeholders aiming to align with the latest industry trends and capitalize on emerging market opportunities.

Artificial Intelligence (AI) in Retail Market Strategy, Price Trends, Drivers, Challenges and Opportunities to 2034

In terms of market strategy, price trends, drivers, challenges, and opportunities from 2025 to 2034, Artificial Intelligence (AI) in Retail market players are directing investments toward acquiring new technologies, securing raw materials through efficient procurement and inventory management, enhancing product portfolios, and leveraging capabilities to sustain growth amidst challenging conditions. Regional-specific strategies are being emphasized due to highly varying economic and social challenges across countries.

Factors such as global economic slowdown, the impact of geopolitical tensions, delayed growth in specific regions, and the risks of stagflation necessitate a vigilant and forward-looking approach among Artificial Intelligence (AI) in Retail industry players. Adaptations in supply chain dynamics and the growing emphasis on cleaner and sustainable practices further drive strategic shifts within companies.

The market study delivers a comprehensive overview of current trends and developments in the Artificial Intelligence (AI) in Retail industry, complemented by detailed descriptive and prescriptive analyses for insights into the market landscape until 2034.

North America Artificial Intelligence (AI) in Retail Market Outlook

The North American Artificial Intelligence (AI) in Retail market experienced significant advancements in 2024, driven by heightened consumer focus on sustainability, technological integration, and personalized offerings across various segments. Growth was propelled by the rise in demand for innovative packaging solutions, eco-friendly products, and digital transformation in retail and service sectors. Companies leveraged advanced technologies such as AI, IoT, and data analytics to enhance customer engagement, optimize supply chains, and develop targeted marketing strategies. From 2025, the market is anticipated to witness robust expansion, underpinned by increasing

adoption of subscription-based services, heightened awareness of eco-conscious consumption, and innovations in packaging and delivery methods. A competitive landscape characterized by continuous product differentiation, strategic mergers and acquisitions, and the influx of startups is reshaping market dynamics, with key players investing in digitalization and sustainability to secure market share.

Europe Artificial Intelligence (AI) in Retail Market Analysis

The European Artificial Intelligence (AI) in Retail market in 2024 demonstrated strong momentum, underpinned by regulatory emphasis on sustainable practices and consumer preferences for high-quality, eco-friendly, and customizable products. Rising interest in cultural and experiential offerings, coupled with advancements in e-commerce and digital solutions, bolstered market growth. The region's focus on circular economy principles encouraged investments in recyclable and biodegradable packaging solutions. Moving into 2025, growth is expected to be driven by the increasing prevalence of innovative retail models, AI-driven personalization, and a surge in demand for wellness-related consumer products. The competitive landscape is marked by robust participation from regional leaders and multinational firms, adopting strategies such as partnerships and green initiatives to meet regulatory and consumer demands, positioning Europe as a hub of innovation and sustainable growth.

Asia-Pacific Artificial Intelligence (AI) in Retail Market Forecast

The Asia-Pacific Artificial Intelligence (AI) in Retail market witnessed dynamic growth in 2024, fueled by rapid urbanization, digital adoption, and evolving consumer preferences for convenience and premium products. Emerging markets played a pivotal role, with increasing disposable income and a young, tech-savvy population driving demand for connected home devices, innovative retail solutions, and functional packaging. Anticipated growth from 2025 stems from an expanding middle class, escalating e-commerce penetration, and strong demand for personalized and health-focused products. Companies are capitalizing on regional trends by localizing offerings and investing in digital infrastructure. The competitive landscape is intensifying, with global players entering the market and local firms leveraging cultural insights and price advantages to capture market share, ensuring a vibrant, fast-paced ecosystem.

Middle East, Africa, Latin America Artificial Intelligence (AI) in Retail Market Analysis

The Rest of the World (RoW) Artificial Intelligence (AI) in Retail market showcased steady development in 2024, supported by advancements in retail automation, growing awareness of sustainable practices, and increasing preference for convenience-driven solutions. Markets in the Middle East, Africa, and South America demonstrated rising adoption of digital payment solutions, recyclable packaging, and smart home

innovations, catering to evolving consumer demands. From 2025, the market is poised for substantial growth, fueled by infrastructure development, the rise of digital platforms, and increasing focus on affordable, quality products. The competitive landscape is characterized by regional players innovating in product design and packaging, while international companies expand through localized strategies and strategic partnerships, ensuring that the RoW remains a critical contributor to global market dynamics.

Artificial Intelligence (AI) in Retail Market Dynamics and Future Analytics

The research analyses the Artificial Intelligence (AI) in Retail parent market, derived market, intermediaries' market, raw material market, and substitute market are all evaluated to better prospect the Artificial Intelligence (AI) in Retail market outlook. Geopolitical analysis, demographic analysis, and Porter's five forces analysis are prudently assessed to estimate the best Artificial Intelligence (AI) in Retail market projections.

Recent deals and developments are considered for their potential impact on Artificial Intelligence (AI) in Retail's future business. Other metrics analyzed include the Threat of New Entrants, Threat of New Substitutes, Product Differentiation, Degree of Competition, Number of Suppliers, Distribution Channel, Capital Needed, Entry Barriers, Govt. Regulations, Beneficial Alternative, and Cost of Substitute in Artificial Intelligence (AI) in Retail market.

Artificial Intelligence (AI) in Retail trade and price analysis helps comprehend Artificial Intelligence (AI) in Retail's international market scenario with top exporters/suppliers and top importers/customer information. The data and analysis assist our clients in planning procurement, identifying potential vendors/clients to associate with, understanding Artificial Intelligence (AI) in Retail price trends and patterns, and exploring new Artificial Intelligence (AI) in Retail sales channels. The research will be updated to the latest month to include the impact of the latest developments such as the Russia-Ukraine war on the Artificial Intelligence (AI) in Retail market.

Artificial Intelligence (AI) in Retail Market Structure, Competitive Intelligence and Key Winning Strategies

The report presents detailed profiles of top companies operating in the Artificial Intelligence (AI) in Retail market and players serving the Artificial Intelligence (AI) in Retail value chain along with their strategies for the near, medium, and long term period.

OGAnalysis' proprietary company revenue and product analysis model unveils the Artificial Intelligence (AI) in Retail market structure and competitive landscape. Company profiles of key players with a business description, product portfolio, SWOT analysis, Financial Analysis, and key strategies are covered in the report. It identifies top-performing Artificial Intelligence (AI) in Retail products in global and regional markets. New Product Launches, Investment & Funding updates, Mergers & Acquisitions, Collaboration & Partnership, Awards and Agreements, Expansion, and other developments give our clients the Artificial Intelligence (AI) in Retail market update to stay ahead of the competition.

Company offerings in different segments across Asia-Pacific, Europe, the Middle East, Africa, and South and Central America are presented to better understand the company strategy for the Artificial Intelligence (AI) in Retail market. The competition analysis enables users to assess competitor strategies and helps align their capabilities and resources for future growth prospects to improve their market share.

Who can benefit from this research

The research would help top management/strategy formulators/business/product development/sales managers and investors in this market in the following ways

1. The report provides 2024 Artificial Intelligence (AI) in Retail market sales data at the global, regional, and key country levels with a detailed outlook to 2034 allowing companies to calculate their market share and analyze prospects, uncover new markets, and plan market entry strategy.
2. The research includes the Artificial Intelligence (AI) in Retail market split into different types and applications. This segmentation helps managers plan their products and budgets based on the future growth rates of each segment
3. The Artificial Intelligence (AI) in Retail market study helps stakeholders understand the breadth and stance of the market giving them information on key drivers, restraints, challenges, and growth opportunities of the market and mitigating risks
4. This report would help top management understand competition better with a detailed SWOT analysis and key strategies of their competitors, and plan their position in the business
5. The study assists investors in analyzing Artificial Intelligence (AI) in Retail business prospects by region, key countries, and top companies' information to channel their investments.

Available Customizations

The standard syndicate report is designed to serve the common interests of Artificial Intelligence (AI) in Retail Market players across the value chain and include selective data and analysis from entire research findings as per the scope and price of the publication.

However, to precisely match the specific research requirements of individual clients, we offer several customization options to include the data and analysis of interest in the final deliverable.

Some of the customization requests are as mentioned below –

Segmentation of choice – Our clients can seek customization to modify/add a market division for types/applications/end-uses/processes of their choice.

Artificial Intelligence (AI) in Retail Pricing and Margins Across the Supply Chain,
Artificial Intelligence (AI) in Retail Price Analysis / International Trade Data / Import-Export Analysis,

Supply Chain Analysis, Supply – Demand Gap Analysis, PESTLE Analysis, Macro-Economic Analysis, and other Artificial Intelligence (AI) in Retail market analytics
Processing and manufacturing requirements, Patent Analysis, Technology Trends, and Product Innovations

Further, the client can seek customization to break down geographies as per their requirements for specific countries/country groups such as South East Asia, Central Asia, Emerging and Developing Asia, Western Europe, Eastern Europe, Benelux, Emerging and Developing Europe, Nordic countries, North Africa, Sub-Saharan Africa, Caribbean, The Middle East and North Africa (MENA), Gulf Cooperation Council (GCC) or any other.
