## Abstracts

The global Asarum Extract Market size is valued at USD 161.5 million in 2024 and is projected to reach USD 276.7 million by 2032, registering a compound annual growth rate (CAGR) of 6.96% over the forecast period.

The asarum extract market is witnessing niche growth driven by its use in traditional Chinese and Japanese medicine for respiratory ailments, analgesic, and anti-inflammatory applications. Asarum (wild ginger) extracts contain essential oils, methyl eugenol, and aristolochic acids used cautiously in herbal formulations. Manufacturers are focusing on aristolochic acid-free extracts, essential oil concentrates for therapeutic use, and standardised powdered forms for traditional remedies. Growth is supported by rising demand for herbal respiratory and analgesic products, integration in Kampo formulations, and expansion of traditional Asian herbal ingredient portfolios. Challenges include toxicity concerns due to aristolochic acids, regulatory restrictions on medicinal use in Western markets, and supply constraints from controlled harvesting. Recent developments include Tsumura launching aristolochic acid-free asarum extracts for Kampo, Xi'an Lyphar introducing essential oil concentrates for respiratory products, and Changsha Staherb enhancing powdered asarum extracts with reduced toxicity.

Major trends include development of aristolochic acid-free asarum extracts for safe use in respiratory and analgesic herbal formulations.

Drivers are rising demand for herbal respiratory relief products, traditional use in Kampo and Chinese medicine, and expansion of herbal ingredient portfolios.

Challenges include toxicity concerns limiting regulatory approvals, supply constraints from controlled wild harvesting, and limited global awareness beyond Asia.

Companies focus on removing aristolochic acids, standardising essential oil contents, and developing safe powdered extracts for traditional formulations.

Recent developments include Tsumura launching safe Kampo extracts, Xi'an Lyphar introducing essential oil concentrates, and Changsha Staherb enhancing reduced-toxicity powdered extracts.
