Abstracts

The Automatic And Smart Pet Feeder Market is valued at USD 2.4 billion in 2025 and is projected to grow at a CAGR of 17.1% to reach USD 9.9 billion by 2034. The Automatic and Smart Pet Feeder market deals with devices that automate the feeding of pets, often with features like scheduled feedings, portion control, and remote monitoring through smartphone apps. These feeders cater to pet owners who want convenience and precise control over their pets' diets. The rise in pet ownership and the increasing adoption of smart home devices are driving this market.

Smart pet feeders typically include features like programmable timers, portion control settings, voice recording for pet calls, and Wi-Fi connectivity. Some models also include built-in cameras to allow owners to monitor their pets remotely. The devices help pet owners to maintain consistent feeding schedules, even when they are away from home.

The market is seeing innovations in features like AI-driven portion control, food recognition, and integration with other smart home devices. The focus is on providing pet owners with more insights into their pets' eating habits and overall health. The growing trend of pet humanization and the increasing availability of affordable smart pet products are contributing to market growth.
