Automotive Logistics Market Overview

Automotive Logistics Market Research Report - is comprehensive research with in-depth data and contemporary analysis of the Automotive Logistics market at a global, regional and key country level, covering different sub-segments of the industry.

The automotive industry is set to experience a few structural changes in the near term due to the rapid developments in novel technologies. Artificial intelligence (AI) and machine learning will significantly transform the manufacturing process improving robotic efficiency, accuracy, and consistency. Level 2 automation including active safety systems and driver assistance is allowing OEMs to add attractive features and bolster revenue growth. However, the full-fledged rollout of level 4 autonomous vehicles is expected to witness further delays for the technology to mature and for consumers to accept.

Impact of COVID-19 on Automotive Logistics market

Automotive Logistics market is quickly reaching its pre-COVID levels and a healthy growth rate is expected over the forecast period driven by the economic revival in most of the developing nations. Frequent suspension of public transport systems coupled with the highly contagious nature of the virus propelled the need for passenger cars leading to the derived demand for Automotive Logistics products.

However, unprecedented situations due to expected third and further waves of the pandemic are creating a gloomy outlook. This study endeavors to evaluate different scenarios of COVID impact on the future of the Automotive Logistics market from 2021 to 2028.
