## **Abstracts**

The global Bulletproof Acrylic Sheet Market size is valued at USD 1.7 billion in 2024 and is projected to reach USD 3.2 billion by 2032, registering a compound annual growth rate (CAGR) of 8.28% over the forecast period.

The bulletproof acrylic sheet market is witnessing stable growth driven by rising demand for lightweight, transparent ballistic protection in banks, retail counters, security booths, and vehicle windows. Bulletproof acrylic sheets provide multi-hit resistance while offering lighter weight compared to traditional glass-clad polycarbonate solutions. Manufacturers are focusing on developing abrasion-resistant coatings, UV-stabilised formulations, and easy fabrication grades for custom installations. Growth is supported by expanding bank branch security upgrades, convenience store safety retrofits, and increasing use in armoured vehicles for weight savings. Challenges include lower scratch resistance compared to glass, limited protection levels versus laminated glass-polycarbonate composites, and compliance with ballistic standards for specific threat levels. Recent developments include Plaskolite launching UV-stabilised bullet resistant acrylic sheets, Palram introducing abrasion-resistant ballistic acrylic panels, and Acrilex enhancing easy-fabrication bulletproof acrylic grades for security applications.

Major trends include development of UV-stabilised, abrasion-resistant bulletproof acrylic sheets with easy fabrication for bank, retail, and vehicle security applications.

Drivers are rising bank and retail security upgrades, increasing use in armoured vehicles for weight reduction, and demand for lightweight transparent ballistic

protection.

Challenges include lower scratch resistance compared to glass solutions, limited ballistic protection levels for high-calibre threats, and compliance with certification standards.

Companies focus on enhancing UV stability and abrasion resistance, developing easy-to-fabricate grades for custom security installations, and optimising formulations for optical clarity and ballistic performance.

Recent developments include Plaskolite launching UV-stabilised sheets, Palram introducing abrasion-resistant panels, and Acrilex enhancing easy-fabrication bulletproof acrylic grades.
