Abstracts

The global Cacumen Platycladi Extract Market size is valued at USD 363.4 million in 2024 and is projected to reach USD 768.3 million by 2032, registering a compound annual growth rate (CAGR) of 9.81% over the forecast period.

The cacumen platycladi extract market is witnessing niche growth driven by its traditional use in Chinese medicine for hair health, haemostatic, and anti-inflammatory benefits. Cacumen Platycladi (biota leaves) extracts contain flavonoids, glycosides, and volatile oils used in hair growth tonics, herbal haemostatic formulations, and anti-inflammatory supplements. Manufacturers are focusing on high-purity flavonoid extraction, water-soluble powdered forms for hair care products, and integration into traditional Kampo and Chinese herbal products. Growth is supported by rising demand for natural hair growth ingredients, expansion of herbal haemostatic product lines, and research supporting anti-inflammatory properties. Challenges include limited global consumer awareness, regulatory restrictions for hair growth claims, and raw material supply consistency from wild harvesting. Recent developments include Xi'an Lyphar launching flavonoid-standardised cacumen platycladi extracts, Shaanxi Jiahe introducing water-soluble powders for hair tonics, and Tsumura enhancing Kampo haemostatic formulations with cacumen platycladi extracts.

Major trends include development of flavonoid-standardised cacumen platycladi extracts for hair growth tonics and haemostatic herbal formulations.

Drivers are rising demand for natural hair care ingredients, traditional use in

haemostasis and anti-inflammatory remedies, and integration into Kampo and Chinese medicine.

Challenges include limited awareness outside Asia, raw material supply consistency due to wild harvesting, and regulatory limitations on hair growth product claims.

Companies focus on enhancing flavonoid extraction purity, developing water-soluble powdered forms for hair tonics, and integrating extracts into traditional and modern herbal products.

Recent developments include Xi'an Lyphar launching standardised extracts, Shaanxi Jiahe introducing soluble powders, and Tsumura enhancing Kampo haemostatic formulations.
