## Abstracts

The global Camellia Seed Extract Market size is valued at USD 523.9 million in 2024 and is projected to reach USD 814.4 million by 2032, registering a compound annual growth rate (CAGR) of 5.67% over the forecast period.

The camellia seed extract market is witnessing moderate growth driven by its application in cosmetics, skincare, and nutraceuticals for antioxidant, anti-inflammatory, and moisturizing benefits. Camellia seed extract, derived from *Camellia oleifera* or *Camellia sinensis* seeds, is rich in oleic acid, polyphenols, and saponins, used in hair care, skin creams, and anti-aging formulations. Manufacturers are focusing on cold-press extraction methods, organic-certified camellia sourcing, and standardised polyphenol content for efficacy-based products. Growth is supported by rising demand for natural oils and extracts in clean beauty formulations, Asian cosmetic ingredient popularity, and expanding application in dietary supplements for cardiovascular health. Challenges include limited global awareness compared to argan or olive oil, supply fluctuations based on regional camellia cultivation, and competition from cheaper vegetable oils in bulk cosmetic formulations. Recent developments include Botaniq introducing organic camellia seed extracts for hair care brands, Greenphyt expanding cold-pressed extract offerings for cosmetics, and Seowon introducing polyphenol-rich camellia extracts for skincare actives in Korea and Japan.

Major trends include increasing use of camellia seed extract in clean beauty formulations for moisturizing, anti-aging, and hair conditioning benefits.

Drivers are rising consumer demand for natural plant-based oils and extracts in skincare and personal care products, and expanding Asian cosmetic ingredient popularity in global markets.

Challenges include limited consumer awareness compared to mainstream oils, regional cultivation limitations affecting supply consistency, and price competitiveness with other vegetable oil extracts.

Companies focus on cold-pressed, organic camellia extract production with standardised polyphenol content to meet cosmetic and nutraceutical industry requirements.

Recent developments include Botaniq launching organic extracts for haircare, Greenphyt expanding cold-pressed camellia offerings, and Seowon introducing polyphenol-rich extracts for skincare actives in Asia.
