Abstracts

The global Coriolus Versicolor Extract Market size is valued at USD 545.8 million in 2024 and is projected to reach USD 841.5 million by 2032, registering a compound annual growth rate (CAGR) of 5.56% over the forecast period.

The Coriolus versicolor extract market is witnessing strong growth driven by its use as an immune-modulating and anticancer adjunct therapy in traditional Chinese and Japanese medicine. Also known as Turkey Tail mushroom extract, it contains polysaccharide-K (PSK) and polysaccharide-peptide (PSP) with clinically studied immune benefits. Manufacturers are focusing on hot-water extraction for high beta-glucan content, standardised polysaccharide formulations, and encapsulated extracts for supplements. Growth is supported by rising demand for immune-boosting supplements, expanding use of medicinal mushrooms in nutraceuticals, and research supporting PSK as an adjunct cancer therapy in Asia. Challenges include regulatory restrictions on cancer health claims in Western markets, supply chain limitations for high-quality raw materials, and consumer education barriers outside Asia. Recent developments include Xi'an Greena Biotech launching PSP-standardised turkey tail extracts, Aloha Medicinals introducing high beta-glucan Coriolus powders, and Nammex enhancing hot-water extracted Coriolus ingredients for supplement brands.

Major trends include development of PSK and PSP-standardised Coriolus extracts with high beta-glucan content for immune support and anticancer supplement markets.

Drivers are rising demand for immune-boosting supplements, growing adoption of

medicinal mushrooms in nutraceuticals, and adjunct cancer therapy research supporting PSK benefits.

Challenges include regulatory restrictions on cancer-related claims, raw material supply limitations for organic-certified *Coriolus*, and low consumer awareness in Western markets.

Companies focus on enhancing beta-glucan extraction yields, standardising PSK and PSP contents for clinical relevance, and expanding encapsulated supplement formulations.

Recent developments include Xi'an Greena launching PSP-standardised extracts, Aloha Medicinals introducing high beta-glucan powders, and Nammex enhancing hot-water *Coriolus* extracts.
