Abstracts

The global diethylene glycol monobutyl ether acetate (DBEA) market is witnessing steady growth, fueled by the rising demand for high-performance coatings in various industries. DBEA, an organic solvent with excellent solvency, coalescing properties, and low volatility, is primarily used in architectural coatings, automotive paints, wood finishes, and printing inks. In 2024, the market witnessed a surge in demand for DBEA as construction activities rebounded globally, driving the consumption of architectural coatings.

Moving into 2025, the DBEA market is expected to maintain its positive growth trajectory. The increasing adoption of water-based and UV-curable coatings, which require high-performance coalescing agents like DBEA, will be a key growth driver. Additionally, the expanding automotive and furniture industries, particularly in developing economies, will contribute to the demand for DBEA-based paints and finishes. However, the market must navigate challenges related to stringent VOC (volatile organic compound) regulations and the development of bio-based solvent alternatives.
