Abstracts

The global disinfectant sprays and wipes market has witnessed remarkable growth in recent years, driven largely by the heightened awareness of hygiene and sanitation following the COVID-19 pandemic. While the initial surge in demand has subsided, the market is entering a new phase characterized by a sustained focus on personal and environmental hygiene across diverse sectors. In 2024, the market demonstrated steady growth as businesses, institutions, and individuals continued to prioritize disinfection practices, integrating them into their daily routines.

Moving into 2025, the disinfectant sprays and wipes market is expected to experience stable growth, albeit at a more moderate pace compared to the peak pandemic years. The increasing prevalence of antibiotic-resistant bacteria and the growing focus on infection prevention in healthcare settings will be key drivers. Additionally, the expanding travel and hospitality industries, where hygiene is paramount, will contribute to market demand. However, the market must navigate challenges related to environmental concerns regarding disposable wipes and the development of sustainable and eco-friendly disinfection solutions.

The comprehensive Disinfectant Sprays and Wipes market research report delivers essential insights into current trends that are shaping the industry, along with prescriptive analyses to capitalize on the market's future growth opportunities. This report is an indispensable tool for decision-makers, offering a thorough understanding of the Disinfectant Sprays and Wipes market dynamics—from raw material sourcing to end-use applications.
