Abstracts

The global Epoxy Zinc Phosphate Primer Market size is valued at USD 1133 million in 2024 and is projected to reach USD 1862.5 million by 2032, registering a compound annual growth rate (CAGR) of 6.41% over the forecast period.

Epoxy zinc phosphate primer market is expanding rapidly as automotive, marine, and industrial sectors use these primers for corrosion protection of steel structures, equipment, and vehicles. These primers combine epoxy resin durability with zinc phosphate corrosion-inhibiting pigments, providing excellent adhesion and anti-corrosive properties under topcoats. Key manufacturers focus on low-VOC, fast-drying formulations compatible with diverse topcoat systems to enhance operational productivity. Growth is driven by rising automotive production, infrastructure maintenance, and shipbuilding activities globally. However, challenges include surface preparation requirements and disposal regulations for zinc-containing coatings. Recent developments include Jotun introducing Barrier Smart Pack, an epoxy zinc phosphate primer with reduced solvent content and superior anti-corrosion performance for offshore and industrial steel structures.

Major trends include increasing use of epoxy zinc phosphate primers for corrosion protection of steel structures in automotive, marine, and heavy industry applications requiring durable, adhesion-promoting undercoats.

Growth is driven by expanding automotive manufacturing, offshore infrastructure maintenance, and shipbuilding industries requiring high-performance corrosion-resistant

primer systems.

Key challenges include stringent surface preparation requirements for effective adhesion, environmental regulations on zinc disposal, and price competition from alternative anti-corrosion coating systems.

Companies are innovating with low-VOC, fast-curing epoxy zinc phosphate primers offering superior adhesion, compatibility with multiple topcoats, and reduced environmental impact.

Recent developments include Jotun launching Barrier Smart Pack, a low-solvent epoxy zinc phosphate primer providing strong anti-corrosion protection and improved productivity for offshore platforms and industrial steel structures.
