The eyebright herb extract market is witnessing niche growth driven by traditional use in eye health supplements, anti-inflammatory applications, and natural skincare products. Eyebright (*Euphrasia officinalis*) extracts contain flavonoids, tannins, and iridoid glycosides used in herbal formulations for relieving eye irritation, inflammation, and allergies. Manufacturers are focusing on high-purity flavonoid extracts, solvent-free extraction processes, and encapsulated formulations for supplements. Growth is supported by rising herbal eye health product launches, increasing demand for natural anti-inflammatory extracts in skincare, and integration in ophthalmic herbal drops in Europe. Challenges include regulatory restrictions on health claims for eye benefits, limited clinical validation for modern ophthalmic use, and raw material supply constraints due to regional cultivation. Companies focus on enhancing extraction purity, standardising flavonoid content for supplements, and developing encapsulated formulations for improved bioavailability.
