Major trends include development of lignan-standardised flax seed extracts and microencapsulated omega-3 extracts for supplements and functional foods.

Drivers are rising vegan and plant-based nutrition trends, demand for cardiovascular and hormone health supplements, and use in functional beverage fortification.

Challenges include oxidation stability issues for omega-3 extracts, flavour masking requirements in beverages, and health claim approval complexities.

Companies focus on enhancing lignan purity, developing microencapsulated omega-3 formulations for stability, and producing water-soluble powdered extracts.
