## **Abstracts**

The global Food Safe Silicone Sheet Market size is valued at USD 1.7 billion in 2024 and is projected to reach USD 2.9 billion by 2032, registering a compound annual growth rate (CAGR) of 6.74% over the forecast period.

Food safe silicone sheet market is growing steadily as food processing, baking, and packaging sectors adopt silicone sheets for their non-stick, temperature-resistant, and FDA-compliant properties. These sheets are used for baking mats, conveyor belts, gaskets, and food contact surface liners. Key manufacturers focus on platinum-cured silicone for high purity, flexibility, and tear resistance, ensuring compliance with food safety standards. Growth is driven by rising bakery production, hygienic food processing trends, and demand for reusable non-stick liners. However, challenges include higher costs than PTFE sheets and limited mechanical strength in high-load applications. Recent developments include Elkem Silicones introducing its food-grade platinum-cured silicone sheet range with enhanced clarity, tear resistance, and temperature stability for global food processing applications.

Major trends include increasing use of food-safe silicone sheets as non-stick, heat-resistant, and reusable liners in baking, food processing, and packaging industries.

Growth is driven by rising bakery and confectionery production, food safety compliance needs, and sustainability trends favouring reusable over disposable liners.

Key challenges include higher material costs compared to PTFE alternatives, limited

load-bearing capacity in conveyor applications, and strict certification requirements for food contact safety.

Companies are innovating with platinum-cured, high-purity silicone formulations featuring improved tear strength, flexibility, and clarity to meet diverse food processing needs.

Recent developments include Elkem Silicones launching its platinum-cured food-grade silicone sheet series with enhanced mechanical strength and temperature resistance to support global food processing and packaging operations.
