The 26th successful version of the Middle East report details the current status of projects, competition, investments and strategies being adapted by companies to strengthen their future.

Review of Middle East LNG Markets in 2017

The section illustrates a quick analysis of the Middle East LNG developments in 2017. Emphasis of projects, trade, strategies, contracts, fleet, pricing and other industry analysis is presented in detail.

Current Status of LNG projects

Updates on all under construction, planned, proposed and concept phase liquefaction and regasification projects with FID status, planned start up, initial capacity and company information is provided.

LNG Infrastructure Details

Key details of all operational and planned LNG terminals along with their operator, start up, trains/vaporizers, storage capacity, tanks, liquefaction/ regasification capacity are included

LNG Capacity Outlook

Country wise liquefaction and regasification capacity is provided for historical period of

2008 to 2017 and forecast period from 2018 to 2022

LNG supply- Demand Outlook

Country wise LNG Export forecast to 2022 and LNG Import forecast to 2022 is provided. Our highly reliable and precise forecasts ensure our readers to strengthen their business decisions.

Emergence of Global LNG Contracts

Competitive Scenario

Top 10 LNG companies and their net weighted capacity outlook is provided in the report. Further, business profiles of 10 leading LNG players are also included in the research.

Country wise Analysis

Across all markets in Middle East, terminal wise capacity is forecast from 2008 to 2022. In addition, key trends, drivers and challenges facing Middle East, Europe, Middle East, Africa, North America and South and Central America are analyzed in detail.

Recent Industry Developments

The report is structured in most user friendly manner for assisting in usage for presentations and detailed analysis. Our reports are periodically validated by industry experts to ensure the right insights are included.
