The Future of United Arab Emirates (UAE) Oil and Gas Industry to 2020 - Forecasts of Supply, Demand, Investment, Companies and Infrastructure (Fields, Blocks, Pipelines, LNG, Refinery, Storage Assets)

OGAnalysis new research service- "The Future of United Arab Emirates Oil and Gas Industry to 2020" provides a comprehensive overview of the United Arab Emirates oil and gas sector, covering the entire value chain of the industry. It analyzes and forecasts each of the oil and gas segments in United Arab Emirates including upstream sector, pipeline, refinery, LNG and storage sectors. The report also gives detailed analysis of investment opportunities in each sector, highlighting the growth potential and feasibility of projects. It also identifies the key challenges, drivers and restraints in the country's oil and gas industry and the impact of these metrics on the industry.

The report gives outlook of United Arab Emirates production and consumption of crude oil, petroleum products, natural gas and coal to 2020. It also provides detailed information including operators, owners, location, capacity and production for each of the oil and gas assets. Company wise and asset wise forecasts along with competitive structure is provided for each segment. Profiles of three major oil and gas companies and updates the major deals and events in the industry.

Scope

Supply- Demand forecast of crude oil, natural gas, petroleum products and coal to 2020

Planned oil and gas projects in upstream, midstream and downstream sectors

Oil and gas field details- production (2000-2009), location, operator, ownership

Refineries- primary and secondary capacity outlook (2000-2015), refineries under operation and implementation (complexity, capacity, location, start up, operator, ownership), refinery expansions

LNG – capacity outlook (2000- 2015), trade imports, utilization rates (2000-2009), operational and planned terminals (location, start up, operator, ownership and capacity)

Storage- oil and gas storage capacity outlook (2000-2015), tank farm details under operation and implementation

Pipeline- crude oil, petroleum product and natural gas pipelines under operation and implementation

In addition, for all oil and gas segments, information on competitive structure and capacity/production by company is provided

Profiles of three major oil and gas companies in United Arab Emirates along with their business overview, SWOT analysis and financial analysis are given in detail.

Latest events in United Arab Emirates oil and gas industry from 2009-2011 and their impact on the industry are analyzed in detail.

Reasons To Purchase

This comprehensive report is a multi-client market study and is used by oil and gas companies, traders, constructors, equipment and service providers, investment and financial institutions. The report allows your company to

Identify new investment opportunities through detailed information on planned projects

Formulate effective growth and expansion strategies through complete information on oil and gas segments including fields, pipelines, LNG, storage terminals and refineries

Mitigate operating risks through supply- demand outlook and capacity forecasts

Gain a better understanding of market size, trends and challenges for each of the oil and gas segments

Gain detailed understanding on each of the oil and gas assets in the country

Beat your competition by identifying new business opportunities

Keep yourself updated with all the latest events in the country's oil and gas industry
