The gallnut extract market is witnessing niche growth driven by its traditional use as an astringent, antimicrobial, and tannin-rich ingredient in pharmaceuticals, leather tanning, and dyeing industries. Gallnut (*Quercus infectoria*) extracts contain high levels of tannic acid and gallic acid used in herbal medicines for diarrhoea and wound healing, as well as industrial applications. Manufacturers are focusing on standardised tannic acid extracts, purified gallic acid extraction, and integration in traditional herbal formulations. Growth is supported by rising demand for natural astringents and antimicrobials, tannin use in dyeing and tanning, and expansion of herbal ingredient portfolios in Asian markets. Challenges include limited consumer awareness in supplements, sustainability issues from overharvesting, and regulatory approvals for therapeutic use. Recent developments include Xi'an Lyphar launching tannic acid-standardised gallnut extracts, Shaanxi Jiahe introducing purified gallic acid powders, and Changsha Staherb enhancing gallnut extract applications in herbal wound care products.

Major trends include development of tannic acid and gallic acid-standardised gallnut extracts for medicinal and industrial applications.
