## **Abstracts**

The global Gate Intercom System Market size is valued at USD 2 billion in 2024 and is projected to reach USD 3.7 billion by 2032, registering a compound annual growth rate (CAGR) of 8.03% over the forecast period.

Gate intercom system market is growing rapidly due to increasing demand for security, visitor management, and convenience across residential complexes, commercial buildings, and industrial facilities. Modern systems integrate audio, video, RFID, and smartphone app connectivity, enhancing real-time communication and access control. Companies are focusing on IP-based intercom systems with cloud integration for remote monitoring and control. Rising smart home adoption and urban gated communities are major drivers, especially in Asia-Pacific and North America. Challenges include cybersecurity risks and high installation costs for advanced systems. Recent developments include Aiphone launching its IXG Series IP video intercom system, offering smartphone integration and enhanced scalability for large buildings.

Major trends include rising preference for IP-based video intercom systems with smartphone connectivity, enabling remote access control and real-time visitor communication for residential and commercial users.

Growing urbanisation, smart city developments, and security concerns are driving installations in gated communities, apartment complexes, offices, and industrial premises to improve safety and operational efficiency.

Key challenges include high upfront installation costs and cybersecurity risks associated with connected systems, which require robust data protection measures to ensure user privacy and system integrity.

Companies are investing in integrating AI-powered facial recognition and cloud-based management with intercom systems to enhance security, scalability, and compatibility with smart building infrastructures.

Recent developments include Aiphone's launch of the IXG Series IP video intercom system, featuring smartphone integration, remote unlocking, and flexible scalability for multi-tenant and commercial building applications.
