## Abstracts

The global Isatis Root Extract Market size is valued at USD 275.3 million in 2024 and is projected to reach USD 452.5 million by 2032, registering a compound annual growth rate (CAGR) of 6.41% over the forecast period.

The isatis root extract market is witnessing steady growth driven by its traditional use in Chinese medicine for antiviral, anti-inflammatory, and immune-boosting properties. Isatis root (Ban Lan Gen) extracts contain indigo, indirubin, and alkaloids used in herbal cold remedies and immune supplements. Manufacturers are focusing on water and ethanol-based extraction for high-purity powders, standardised indirubin content for pharmaceutical applications, and integration in herbal teas and capsules. Growth is supported by rising demand for natural antiviral supplements, traditional Chinese herbal remedy adoption, and expansion of herbal extract portfolios in nutraceutical markets. Challenges include quality variability of raw materials, limited global regulatory acceptance outside Asia, and potential adulteration issues in bulk supply chains. Recent developments include Xi'an Greena launching indirubin-standardised isatis extracts, Tsumura enhancing Ban Lan Gen formulations in Kampo medicine, and Shaanxi Jiahe introducing water-soluble isatis root powders for beverages.

Major trends include development of indirubin-standardised isatis root extracts for immune-boosting and antiviral supplement applications.

Drivers are rising demand for natural antiviral and immune support supplements, adoption of traditional Chinese remedies, and expansion of herbal extract portfolios

globally.

Challenges include raw material quality variability, limited regulatory approvals outside Asia, and risks of adulteration in bulk supply chains.

Companies focus on standardising indirubin content, enhancing extraction purity, and developing water-soluble powders for beverage and capsule formulations.

Recent developments include Xi'an Greena launching standardised extracts, Tsumura enhancing Kampo medicine formulations, and Shaanxi Jiahe introducing water-soluble isatis powders.
