The Israel oil and gas market is undergoing a rapid transformation over the recent past. The country offers a strong growth outlook with significant new investment opportunities in the medium to long term future. In particular, domestic and foreign companies planning to expand their operations in the Israel midstream and downstream oil and gas industry will witness new opportunities.

Amidst the series of latest market developments, OGANalysis – the leading oil and gas research and consulting company published a comprehensive guide for strategy formulation and business development decision-makers interested in Israel oil and gas. The Israel oil and gas industry research includes comprehensive data and analysis on the country's oil and gas trends, oil and gas projects, planned investments, competition and market developments to 2025. The study presents short term and long term trends shaping the future of Israel oil and gas markets. The report also presents reliable forecasts for the production and consumption of Israel crude oil, natural gas, motor gasoline, diesel, Fuel oil, LPG along with Primary energy demand, economic growth, and population. Further, the plant-by-plant capacity outlook of refining (CDU, coking, FCC, HCC), oil and chemicals storage terminals, LNG liquefaction terminals/regasification terminals are provided to 2023.

The analytical report details all major operational, planned and proposed oil and gas projects in Israel. In addition, investment opportunities in the country's oil and gas sector are detailed. The study evaluates the country's energy infrastructure, market conditions, investment potential and competitive landscape of oil and gas upstream, LNG, storage, and downstream refining markets.

To assess the real prospects and restraints of expanding or operating in the Israel oil

and gas market are identified through detailed SWOT Analysis. Further, the country's oil and gas market is benchmarked against its peer markets in the region. It also highlights Israel's market potential and project feasibility. In-depth data on exploration blocks, refineries, storage and LNG terminals along with required capital investments (CAPEX), current status, planned commencement dates, companies and organizations involved in planned projects are detailed.

The report also analyzes three leading oil and gas companies operating in the Israel oil and gas value chain.
