Abstracts

The global Maitake Mushroom Extract Market size is valued at USD 146 million in 2024 and is projected to reach USD 267.8 million by 2032, registering a compound annual growth rate (CAGR) of 7.88% over the forecast period.

The maitake mushroom extract market is witnessing stable growth driven by its use in immune support, metabolic health, and cancer adjunct supplements. Maitake (*Grifola frondosa*) extracts are rich in beta-glucans, polysaccharides, and D-fraction compounds used for immune modulation, blood sugar regulation, and anti-tumour benefits. Manufacturers are focusing on hot water extraction for high beta-glucan yields, D-fraction standardised formulations for oncology support, and encapsulated extracts for nutraceutical supplements. Growth is supported by rising consumer demand for immune-boosting mushrooms, integration of medicinal mushroom extracts into functional foods, and research supporting maitake's immunomodulatory and antidiabetic properties. Challenges include raw material supply variability, high extraction costs for D-fraction concentrates, and regulatory approvals for cancer health claims. Recent developments include Mushroom Wisdom launching D-fraction maitake extracts for oncology support, Nammex introducing high beta-glucan maitake powders, and Xi'an Greena Biotech enhancing maitake extract purity for supplements.

Major trends include development of D-fraction-standardised maitake extracts for immune and oncology support, and high beta-glucan extracts for metabolic health.

Drivers are rising demand for immune-boosting supplements, integration of medicinal

mushrooms in functional foods, and research supporting antidiabetic benefits.

Challenges include high extraction costs for concentrated D-fraction, raw material supply variability, and regulatory limitations on cancer claims in Western markets.

Companies focus on enhancing beta-glucan extraction yields, developing D-fraction concentrates for oncology support, and integrating maitake extracts into dietary supplements.

Recent developments include Mushroom Wisdom launching D-fraction extracts, Nammex introducing beta-glucan powders, and Xi'an Greena enhancing maitake extract purity.
