Micro LED market overview –

Micro LED market illustrates an attractive growth rate during the forecast period with the advancements in technologies. Latest developments in Artificial Intelligence and machine learning abilities to expand Micro LED applications and drive demand during the forecast period to 2028.

The pandemic COVID 19 has a significant impact on the manufacturers of Micro LED due to disruptions in the supply chain and frequent lockdowns. Further, the economic slowdown and geopolitical matters have limited the Micro LED market growth in 2020. As the market recovers from the pandemic, we forecast the growth trajectory to vary across regions with some countries offering huge growth potential while others reporting limited profit margins.

New generation Micro LED with improved performance offering higher accuracy and flexibility, with easy integration into systems spur the growth in Micro LED industry. However, a paradigm shift towards a connected world and growing requirement for miniaturization are necessitating further advancement in the Micro LED market and develop smarter products.

Research and development in the Micro LED industry to drive down costs and improve functionality are expected to advance in the medium term. Autonomous vehicles poised to hit the mainstream alongside rapid growth in AI computing capabilities with improving commercials are offering enormous opportunities in the Micro LED market. Over the forecast period to 2028, we forecast the Micro LED market to regain growth momentum,

mainly with support from developing markets.

Micro LED market competitive landscape–

On the Micro LED market structure front, consolidation observed in 2020 is expected to be continued in 2021. Mergers and acquisitions are primarily intended to acquiring new technologies, strengthening portfolios, and leveraging capabilities.

Companies operating in the Micro LED market were hard hit by the adverse effects of COVID, with the major difficulty being the supply chain management. Managing production with shortages in supply and man force has limited the profitability of companies in 2020 and created the need to adapt to more agile methods of working. However, growing trends of online work and education along with the exponential development of the e-commerce industry facilitate companies to regain their market share. Detailed profiles of top companies in the Micro LED industry along with their key strategies to 2028 are provided in the report.
