Abstracts

The global Milk Thistle Seed Extract Market size is valued at USD 333.4 million in 2024 and is projected to reach USD 524.6 million by 2032, registering a compound annual growth rate (CAGR) of 5.83% over the forecast period.

The milk thistle seed extract market is witnessing steady growth driven by rising demand for natural liver health supplements, hepatoprotective formulations, and detoxification products in nutraceuticals and pharmaceuticals. Milk thistle extract, rich in silymarin flavonoids, is used for liver support, antioxidant protection, and anti-inflammatory applications. Manufacturers are focusing on standardised silymarin concentrations, organic-certified extracts, and solvent-free extraction technologies to meet clean-label and efficacy requirements. Growth is supported by increasing consumer preference for herbal liver health products, expanding geriatric populations with liver function concerns, and rising formulation use in herbal blends. Challenges include raw material supply fluctuations due to regional cultivation dependencies, variable bioavailability limiting clinical efficacy, and regulatory differences between dietary supplements and herbal medicines across countries. Recent developments include Martin Bauer expanding organic milk thistle extract production in Europe, Xi'an Greena Biotech introducing high-purity silymarin extracts for capsules, and Gaia Herbs enhancing its standardized milk thistle liquid extracts for liver detox product lines.

Major trends include rising use of standardized, solvent-free milk thistle extracts in liver detox supplements and herbal formulations targeting liver health and oxidative stress.

Drivers are increasing consumer awareness of herbal liver protectants, growing nutraceutical market demand for plant-based antioxidants, and clinical studies supporting silymarin efficacy.

Challenges include variability in silymarin content across suppliers, limited bioavailability requiring advanced formulations, and regulatory restrictions in therapeutic health claims for dietary supplements.

Companies focus on developing high-purity, organic milk thistle extracts with improved absorption technologies and expanding herbal product lines targeting liver health.

Recent developments include Martin Bauer increasing European organic extract production, Xi'an Greena launching high-purity silymarin extracts, and Gaia Herbs enhancing liquid extract formulations for liver detox products.
