The global Modular Belt Conveyor Market size is valued at USD 5.5 billion in 2024 and is projected to reach USD 8.8 billion by 2032, registering a compound annual growth rate (CAGR) of 6% over the forecast period.

Modular belt conveyor market is growing steadily as manufacturing, food processing, packaging, and logistics industries adopt modular plastic belt conveyors for flexible, durable, and hygienic material handling. These conveyors use interlocking plastic modules instead of traditional fabric belts, enabling easy cleaning, reduced maintenance, and customisable layouts. Key manufacturers focus on low-friction, FDA-approved materials, easy belt replacement designs, and modular frame configurations to enhance operational efficiency. Growth is driven by rising automation in food processing, bottling, and intralogistics sectors. However, challenges include higher initial costs compared to traditional belts and training needs for modular assembly and maintenance. Recent developments include Intralox introducing its ThermoDrive modular conveyor belts with improved hygiene, reduced product waste, and easier cleaning for meat and seafood processing plants.

Major trends include increasing use of modular plastic belt conveyors in food processing, bottling, and packaging industries for enhanced hygiene, durability, and layout flexibility.

Growth is driven by automation trends in intralogistics, food safety regulations requiring hygienic conveyor systems, and demand for easy-to-maintain modular designs in

production facilities.

Key challenges include higher upfront equipment costs compared to conventional belts and specialised training requirements for assembly, maintenance, and layout reconfiguration.

Companies are innovating with low-friction, easy-clean FDA-compliant materials, modular frames, and quick belt replacement systems to improve operational uptime and hygiene standards.

Recent developments include Intralox launching ThermoDrive modular conveyor belts with improved hygienic design, reducing cleaning time and product waste in meat and seafood processing facilities.
