Abstracts

The global Oleander Extract Market size is valued at USD 186.3 million in 2024 and is projected to reach USD 376.7 million by 2032, registering a compound annual growth rate (CAGR) of 9.2% over the forecast period.

The oleander extract market is witnessing niche growth driven by its traditional use in folk medicine and research for potential anticancer applications. Oleander (*Nerium oleander*) extracts contain cardiac glycosides such as oleandrin with claimed antiviral and anticancer effects, though toxicity concerns limit widespread use. Manufacturers are focusing on developing purified and standardised oleandrin extracts for controlled pharmaceutical research, topical formulations for dermatological uses, and integration into investigational oncology treatments. Growth is supported by ongoing clinical studies evaluating oleandrin's role in cancer therapy, traditional ethnobotanical use in some regions, and exploratory antiviral research. Challenges include high toxicity risks, narrow therapeutic index requiring medical supervision, and regulatory restrictions prohibiting supplement use in many countries. Recent developments include Phoenix Biotechnology advancing oleandrin-based anticancer drug candidates, Anvirzel conducting clinical studies for cancer treatments, and herbal research institutes isolating oleandrin for pharmacological evaluation.

Major trends include development of purified oleandrin extracts for oncology and antiviral pharmaceutical research.

Drivers are ongoing clinical trials for anticancer applications, traditional ethnobotanical

use in folk remedies, and exploratory antiviral research on cardiac glycosides.

Challenges include high toxicity risks limiting supplement use, strict regulatory restrictions, and narrow therapeutic index requiring medical oversight.

Companies focus on pharmaceutical-grade purification processes, enhancing oleandrin standardisation for controlled dosing, and supporting clinical research for oncology treatments.

Recent developments include Phoenix Biotechnology advancing anticancer candidates, Anvirzel conducting cancer clinical studies, and herbal institutes isolating oleandrin for pharmacology.
