Abstracts

The PCI Express (PCI-e) market is one of the dynamic markets sensors technology segment with major factors such as technological advancements, wide range adoption and large scale applications.

The COVID-19 pandemic had a negative impact on the market size for the year 2020, with small and medium scale companies struggling to sustain their businesses in the near term future. We anticipate around 2% to 3% deviation in growth outlook due to the corona virus spread. The PCI Express (PCI-e) market growth has become variable by region with some countries offering huge growth potential while others face closures and low profit margins.

Over the medium to long term future, we anticipate the PCI Express (PCI-e) market to regain growth momentum, mainly with support from developing markets.
