Abstracts

The global Plantain Extract Market size is valued at USD 1.5 billion in 2024 and is projected to reach USD 2.6 billion by 2032, registering a compound annual growth rate (CAGR) of 6.88% over the forecast period.

The plantain extract market is witnessing steady growth driven by traditional use in European, Chinese, and Ayurvedic medicine for respiratory, anti-inflammatory, and wound healing benefits. Plantain (*Plantago major*) extracts contain aucubin, allantoin, and flavonoids used in herbal cough remedies, skincare formulations, and dietary supplements. Manufacturers are focusing on water-based extraction for herbal teas, high-purity powdered extracts for capsules, and standardisation of aucubin content for therapeutic efficacy. Growth is supported by rising demand for herbal respiratory health supplements, natural skincare ingredient launches, and integration into traditional cough syrup formulations. Challenges include raw material availability due to regional collection, regulatory restrictions on therapeutic claims, and standardisation complexities for consistent active content. Recent developments include Xi'an Lyphar launching aucubin-standardised plantain extracts, Naturex introducing high-purity plantain powders for supplements, and Bio-Botanica enhancing glycerite plantain extracts for herbal syrups.

Major trends include development of aucubin-standardised plantain extracts for respiratory health supplements and wound healing skincare formulations.

Drivers are rising demand for herbal respiratory and cough remedies, use in natural

skincare for anti-inflammatory benefits, and traditional medicine integration globally.

Challenges include regional raw material collection limitations, regulatory restrictions on therapeutic claims in supplements, and consistency issues in active standardisation.

Companies focus on enhancing extraction purity, standardising aucubin content, and developing water-soluble and glycerite forms for syrup and skincare formulations.

Recent developments include Xi'an Lyphar launching standardised extracts, Naturex introducing high-purity powders, and Bio-Botanica enhancing glycerite plantain extracts.
