Abstracts

Sensors in Automotive Applications market overview –

The traditional sensors market is moving towards smart sensors and illustrates an attractive growth rate during the forecast period. Sensors in Automotive Applications market offering higher accuracy and flexibility with easy integration into distributed systems is continuously expanding its application areas.

The pandemic COVID 19 has a significant impact on the manufacturers of Sensors in Automotive Applications due to disruptions in the supply chain and frequent lockdowns. Further, the economic slowdown and geopolitical matters have limited the Sensors in Automotive Applications market growth in 2020. As the market recovers from the pandemic, we forecast the growth trajectory to vary across regions with some countries offering huge growth potential while others reporting limited profit margins.

New generation Sensors in Automotive Applications with improved performance offering higher accuracy and flexibility, with easy integration into systems spur the growth in Sensors in Automotive Applications industry. However, a paradigm shift towards a connected world and growing requirement for miniaturization are necessitating further advancement in the Sensors in Automotive Applications market to develop smarter products.

Research and development in the Sensors in Automotive Applications industry to drive down costs and improve functionality are expected to advance in the medium term. Autonomous vehicles poised to hit the mainstream alongside rapid growth in AI computing capabilities with improving commercials are offering enormous opportunities

in the Sensors in Automotive Applications market. Over the forecast period to 2028, we forecast the Sensors in Automotive Applications market to regain growth momentum, mainly with support from developing markets.

Key Trends in the Sensors in Automotive Applications market –

The proliferation of 5G activities, growing IoT commercialization, and development of smart cities will continue to evolve and accelerate in 2021

Advancements in the adoption rates of wearables in health care will be one of the most significant drivers of the Sensors in Automotive Applications market from 2021 to 2028 with other prospective applications in predictive maintenance for machines, AI computing, autonomous vehicles, smart consumer electronics, and precision agriculture

Social distancing, preference to contactless operations, and smart connected spaces are expected to continue Post COVID

low power requirements without degradation of performance, sensor fusion, and miniaturization are the key focus areas of the Sensors in Automotive Applications market

R&D in Sensors in Automotive Applications market to improve security within the IoT for safer transmission of important data and enhance remote operability will continue

Sensors in Automotive Applications market competitive landscape–

On the Sensors in Automotive Applications market structure front, consolidation observed in 2020 is expected to be continued in 2021. Mergers and acquisitions are primarily intended to acquiring new technologies, strengthening portfolios, and leveraging capabilities.

Companies operating in the Sensors in Automotive Applications market were hard hit by the adverse effects of COVID, with the major difficulty being the supply chain management. Managing production with shortages in supply and man force has limited the profitability of companies in 2020 and created the need to adapt to more agile methods of working. However, growing trends of online work and education along with the exponential development of the e-commerce industry facilitate companies to regain their market share. Detailed profiles of top companies in the Sensors in Automotive Applications industry along with their key strategies to 2028 are provided in the report.

Impact of COVID 19 on Sensors in Automotive Applications Industry –

The global Sensors in Automotive Applications market study carefully examines the deviation in the global outlook due to COVID - 19 considering its impact on supply chain, economy, and consumer preferences by country and region.

The report identifies competitive strategies being implemented and planned by key companies in the Sensors in Automotive Applications market to counter adverse effects and take advantage of the new opportunities created by the pandemic situation. Different scenarios based on expected containment of the virus in the medium to long term are considered to provide Sensors in Automotive Applications market forecasts.

Sensors in Automotive Applications market segmentation –

The research estimates global Sensors in Automotive Applications market revenues in 2021 with a detailed market share and penetration of different types, technologies, applications, and geographies in the Sensors in Automotive Applications market to 2028.

The study identifies current trends along with potential drivers and challenges leading to growth or decline in their market share, for each segment during the outlook period.

The report covers the North America Sensors in Automotive Applications market, Europe Sensors in Automotive Applications market, Asia Pacific Sensors in Automotive Applications market, Middle East Sensors in Automotive Applications market, and LATAM Sensors in Automotive Applications markets from 2020 to 2028. The status of the Sensors in Automotive Applications market in key countries in each region is elaborated to enable an in-depth understanding of the Sensors in Automotive Applications industry.

Reasons to Procure this Report -

The research would help top management/strategy formulators/business/product development/sales managers and investors in this market in the following ways

1. The report provides 2021 Sensors in Automotive Applications market revenues at the global, regional, and key country level with a detailed outlook to 2028 allowing companies to calculate their market share and analyze prospects, and uncover new

markets to target

2. The research includes the Sensors in Automotive Applications market split by different types, technologies, applications, and end-uses. This segmentation helps managers plan their products and budgets based on future growth rates of each segment

3. The Sensors in Automotive Applications market study helps stakeholders understand the breadth and stance of the market giving them information on key drivers, restraints, challenges, and growth opportunities of the market and mitigate risks

4. This report would help top management understand competition better with a detailed SWOT analysis and key strategies of their competitors, and plan their position in the business

5. The study assists investors in analyzing Sensors in Automotive Applications business prospects by region, key countries, and top companies' information to channel their investments.

What's Included in the Report -

Global Sensors in Automotive Applications Market size and growth projections, 2020- 2028

Sensors in Automotive Applications Market size, share, and growth projections across 5 regions and 18 countries, 2020- 2028

Sensors in Automotive Applications market size and CAGR of key products, applications, and end-user verticals, 2020- 2028

Short and long term Sensors in Automotive Applications Market trends, drivers, restraints, and opportunities

Porter's Five forces analysis

Profiles of 5 leading companies in the industry- overview, key strategies, financials, and products

Latest market news and developments

Additional support -

All the data presented in tables and charts of the report is provided in a separate Excel document

Print authentication allowed on purchase of online versions

10% free customization to include any specific data/analysis to match with the requirement

3 months of analyst support

The report will be updated to the latest month and delivered within 3 business days

Contents

1. EXECUTIVE SUMMARY

- 1.1 Sensors in Automotive Applications Market Overview, 2021
- 1.1 Sensors in Automotive Applications Fastest-Growing Types, 2021-2028
- 1.2 Sensors in Automotive Applications Leading Application Segments, 2021-2028
- 1.3 Sensors in Automotive Applications High Potential markets, 2021-2028

2. MARKET INSIGHTS AND STRATEGIC ANALYSIS

- 2.1 Key Market trends
- 2.2 Market Drivers
- 2.3 Market Challenges
- 2.4 Industry Attractiveness - Porter's Five Forces Analysis
- 2.5 Impact of COVID-19 on the Market

3. GLOBAL SENSORS IN AUTOMOTIVE APPLICATIONS MARKET OUTLOOK

- 3.1 Global Sensors in Automotive Applications Market Outlook by Type, 2021-2028
- 3.2 Global Sensors in Automotive Applications Market Outlook by Application, 2021-2028
- 3.3 Global Sensors in Automotive Applications Market Outlook by Country, 2021-2028

4. ASIA PACIFIC SENSORS IN AUTOMOTIVE APPLICATIONS MARKET OUTLOOK

- 4.1 Key Snapshot, 2021
- 4.2 Asia Pacific Sensors in Automotive Applications Market Outlook by Type, 2021-2028
- 4.3 Asia Pacific Sensors in Automotive Applications Market Outlook by Application, 2021-2028
- 4.4 Asia Pacific Sensors in Automotive Applications Market Outlook by Country, 2021-2028

5. EUROPE SENSORS IN AUTOMOTIVE APPLICATIONS MARKET OUTLOOK AND GROWTH OPPORTUNITIES

- 5.1 Key Snapshot, 2021
- 5.2 Europe Sensors in Automotive Applications Market Outlook by Type, 2021-2028

5.3 Europe Sensors in Automotive Applications Market Outlook by Application, 2021-2028

5.4 Europe Sensors in Automotive Applications Market Outlook by Country, 2021-2028

6. NORTH AMERICA SENSORS IN AUTOMOTIVE APPLICATIONS MARKET OUTLOOK AND GROWTH OPPORTUNITIES

6.1 Key Snapshot, 2021

6.2 North America Sensors in Automotive Applications Market Outlook by Type, 2021-2028

6.3 North America Sensors in Automotive Applications Market Outlook by Application, 2021-2028

6.4 North America Sensors in Automotive Applications Market Outlook by Country, 2021-2028

7. SOUTH AND CENTRAL AMERICA SENSORS IN AUTOMOTIVE APPLICATIONS MARKET OUTLOOK AND GROWTH OPPORTUNITIES

7.1 Key Snapshot, 2021

7.2 South and Central America Sensors in Automotive Applications Market Outlook by Type, 2021-2028

7.3 South and Central America Sensors in Automotive Applications Market Outlook by Application, 2021-2028

7.4 South and Central America Sensors in Automotive Applications Market Outlook, 2021-2028

8. MIDDLE EAST AFRICA SENSORS IN AUTOMOTIVE APPLICATIONS MARKET OUTLOOK AND GROWTH OPPORTUNITIES

8.1 Key Snapshot, 2021

8.2 Middle East Africa Sensors in Automotive Applications Market Outlook by Type, 2021-2028

8.3 Middle East Africa Sensors in Automotive Applications Market Outlook by Application, 2021-2028

8.4 Middle East Africa Sensors in Automotive Applications Market Outlook by Country, 2021-2028

9. COMPETITIVE ANALYSIS

9.1 Leading Companies in Sensors in Automotive Applications Market

9.2 Business Profiles of Leading Sensors in Automotive Applications Companies

Introduction

SWOT Analysis

Financial Analysis

10. LATEST NEWS AND DEVELOPMENTS IN GLOBAL SENSORS IN AUTOMOTIVE APPLICATIONS MARKET

11. APPENDIX

11.1 Publisher's Expertise

11.2 OGANalysis Online Data Portal

11.3 Sources and Research Methodology
