#### Research Methodology in Brief

The study was conducted using an objective combination of primary and secondary information including inputs and validations from real-time industry experts.

The proprietary process culls out necessary data from internal databases developed over 15 years and updated accessing 10,000+ sources daily including Soybean Oil Industry associations, organizations, publications, trade, and other statistical sources. An in-depth product and revenue analysis is performed on top Soybean Oil industry players along with their business and geography segmentation.

Receive primary inputs from subject matter experts working across the Soybean Oil value chain in various designations. We often use paid databases for any additional data requirements or validations.

Our in-house experts utilizing sophisticated methods including data triangulation, will connect the dots and establish a clear picture of the current Soybean Oil market conditions, market size, and market shares.

We study the value chain, parent and ancillary markets, technology trends, recent developments, and influencing factors to identify demand drivers/variables in the short, medium, and long term.

Various statistical models including correlation analysis are performed with careful analyst intervention to include seasonal and other variables to analyze different scenarios of the future Soybean Oil market in different countries.

These primary numbers, assumptions, variables, and their weightage are circulated to the expert panel for validation and a detailed standard report is published in an easily understandable format.

#### Available Customizations

The standard syndicate report is designed to serve the common interests of Soybean Oil Market players across the value chain and include selective data and analysis from entire research findings as per the scope and price of the publication.

However, to precisely match the specific research requirements of individual clients, we offer several customization options to include the data and analysis of interest in the final deliverable.

Some of the customization requests are as mentioned below –

Segmentation of choice – Our clients can seek customization to modify/add a market division for types/applications/end-uses/processes of their choice.
