Abstracts

The global Thyroid Extract Market size is valued at USD 1.4 billion in 2024 and is projected to reach USD 2.4 billion by 2032, registering a compound annual growth rate (CAGR) of 6.74% over the forecast period.

The thyroid extract market is witnessing niche growth driven by its use in natural desiccated thyroid (NDT) therapies for hypothyroidism management. Thyroid extracts, typically derived from porcine or bovine sources, contain natural T3 and T4 hormones used in prescription thyroid hormone replacement therapies. Manufacturers are focusing on pharmaceutical-grade standardisation for T3 and T4 content, enhancing purification processes to ensure safety and efficacy, and developing compounded NDT formulations. Growth is supported by rising hypothyroidism prevalence, preference for natural thyroid over synthetic levothyroxine in certain patient groups, and expansion of compounding pharmacy services. Challenges include strict regulatory controls as thyroid extracts are prescription-only drugs, potential hormone variability risks, and ethical concerns over animal-derived hormone use. Recent developments include Armour Thyroid enhancing consistency in desiccated thyroid tablets, Nature-Throid expanding compounded thyroid extract offerings, and NP Thyroid improving manufacturing quality standards for NDT products.

Major trends include development of pharmaceutical-grade desiccated thyroid extracts with consistent T3 and T4 hormone ratios.

Drivers are rising hypothyroidism treatment needs, patient preference for natural thyroid

over synthetic options, and growth in compounding pharmacy services.

Challenges include strict prescription drug regulations, hormone potency variability risks, and ethical considerations for animal-derived hormone therapies.

Companies focus on enhancing standardisation and purification processes, ensuring consistent hormone content, and improving manufacturing compliance with pharmaceutical regulations.

Recent developments include Armour Thyroid enhancing tablet consistency, Nature-Thyroid expanding compounded extracts, and NP Thyroid improving manufacturing standards.
